## Mouser Electronics Adds MaxStream to Product Portfolio

**Mansfield, Texas, USA – November 27, 2006** – Mouser Electronics, Inc., the fastest growing catalog distributor in the electronics industry, today announced it has extended its distribution agreement with Digi International to include the MaxStream embedded product family.

MaxStream products provide a complete line of reliable proprietary and ZigBee wireless solutions that allow customers to monitor and control electronic devices. The company's easy-to-use products include ZigBee modules, proprietary RF modems, and development tools that provide a menu of distance and speed options ranging from 100 feet to 40 miles and a few kbps to 1.5Mbps. Typical applications include automated utility meter reading, oil and gas monitoring, remote control and monitoring of commercial heating and air conditioning systems, vehicle information access for fleet management, industrial controls, wireless sensors, and electronic signals.

According to Larry Kraft, Digi International's Vice President of Global Sales and Marketing, Mouser is a well-known, trusted distributor who is outstanding at maintaining its new product focus in both their print and online catalogs.

"We had selected Mouser because it offers a broad line of products to a wide range of industries that are key targets for increasing our business," Kraft said. "We are excited to expand and enhance our relationship by bringing the MaxStream brand of ZigBee and proprietary wireless modules to Mouser's broad and unique customer base."

According to Glenn Smith, Mouser President and CEO, the extended distribution agreement with Digi is in keeping with the distributor's business model of continuing to offer the newest, most innovative products and the latest technologies, thus delivering a time-to-market advantage to its customers.

"We are pleased to extend our agreement with Digi International to include their newly-acquired MaxStream ZigBee modules and proprietary RF modem products to our linecard," Smith said. "Offering these new and innovative products is exactly what our engineering customers expect from us."

--continued --

Mouser not only launches new products daily on its website, but the company is the only distributor to publish a new 1,800+ page print catalog every 90 days. In addition, Mouser provides same-day shipping and no minimum order requirements on most orders, which will further enable MaxStream products to be delivered quickly into the hands of the distributor's unique customer base.

### **About Mouser**

Mouser Electronics, a privately-held company and a subsidiary of TTI, Inc., is the fastest growing broad-line catalog distributor in the electronics industry and the **only** distributor whose rapid new product introduction gives customers a time-to-market advantage!

Mouser is the only distributor to publish a new 1,800+ page print catalog every 90 days! The catalog has a yearly circulation of one million, with quarterly mailings of 250,000. In addition, its first-class website is updated daily and has over 720,000 products available for online purchase 24 hours every day. Mouser.com also provides more than 490,000 downloadable data sheets, over 1.5 million cross-references, and global shipment to over 170 countries.

Known for best-in-class customer service with its one-call solution, Mouser sells innovative products from over 330 premiere suppliers of semiconductors, optoelectronics, embedded solutions, passives, circuit protection, interconnects, wire and cable, electromechanical, sensors, enclosures and thermal management, power sources, test, tools, and specialty products.
