Mouser Electronics and Power Integrations Ink Global Distribution Agreement

Mouser Now Stocking Power Integrations' High-voltage Analog IC Products

Mansfield, Texas, USA – April 10, 2006 – Mouser Electronics, Inc., the fastest growing electronics distributor in the industry, today announced a distribution agreement with Power Integrations, Inc., the leading supplier of high-voltage analog integrated circuits for the power conversion marketplace.

Power Integrations' breakthrough silicon technology enables compact, lightweight, cost-effective power supplies for a wide range of AC-DC and DC-DC applications, including consumer electronics, communications devices, and industrial applications. Its EcoSmart[®] energy-efficient technology enables power supply designers to meet the growing requirements of all existing and proposed standby and no-load energy efficiency standards worldwide.

"Mouser's proven ability to reach customers and create demand makes them a valuable partner for Power Integrations," said James Harrington, Director of Sales for the Americas, Power Integrations. "We are counting on Mouser to expand our customer base and significantly grow our business."

The distribution agreement with Power Integrations is in keeping with Mouser's business model of continuing to offer the newest, most innovative products and the latest technologies, giving Mouser customers a time-to-market advantage no other distributor can deliver.

"Because we focus on our customers' design creation efforts by quickly introducing them to the newest products and technologies available in the marketplace," said Barry McConnell, Mouser Vice President of Product Marketing, "we are very excited to be the first to publish Power Integrations' technology-driven products in a components catalog."

-- continued --

Mouser is stocking a wide range of Power Integrations products, including the recently introduced PeakSwitch™, the industry's first integrated switcher IC with peak power capability. Other key products include the LinkSwitch®-LP and the LinkSwitch®-XT families, designed to replace inefficient linear power supplies, as well as TinySwitch®-III, the next generation of the world's most widely used family of high-voltage power-conversion ICs.

About Mouser Electronics

Mouser Electronics, a privately-held company and a subsidiary of TTI, Inc., is the fastest growing broad-line catalog distributor in the electronics industry and the **only** distributor in the industry to publish a new 1,700+ page print catalog every 90 days. This gives Mouser customers a time-to-market advantage that no other distributor in the industry can offer.

In addition to its print catalog, Mouser's continuously growing on-line catalog provides over 620,000 products to buy, more than 460,000 data sheets to download, and in excess of 1.5 million cross-references. Known for its best-in-class customer service, Mouser sells innovative products from over 300 premiere suppliers of semiconductors, optoelectronics, passives, circuit protection, interconnects, wire and cable, electromechanical, sensors, enclosures and thermal management, power sources, test, tools, and specialty products.
