Mouser Electronics Signs Distribution Agreement with Texas Instruments

Mansfield, Texas, USA – May 1, 2006 – Mouser Electronics, Inc., the fastest growing catalog distributor in the industry, today announced it has signed a distribution agreement with **Texas Instruments Incorporated**, the leading provider of innovative DSP and analog technologies. In the agreement, Texas Instruments has authorized Mouser Electronics to distribute TI products in the Americas through Mouser's catalog and technical sales force.

"This is very exciting for Mouser. Not only are we Texas Instruments' newest authorized distributor, we also worked closely with them to ensure that we have the newest TI products on the shelf," according to Mouser President and CEO Glenn Smith. "In fact, our TI inventory is now in place and includes many new TI products just released to the market, including TI's Zigbee™ wireless devices and the new T2 Power Modules.

"Being the first to stock and market a new product is one of our core competencies at Mouser," Smith added, "and with Texas Instruments launching more than a hundred new products every quarter, we are well aligned to help the design engineer leverage those new technologies and create added value for his new product design."

According to Jeff Newell, Texas Instruments, Director of the Americas Distribution Group, "We were impressed at how focused Mouser is on new products, new technologies, and fulfilling the requirements of the design engineering community, not to mention Mouser's obvious ability to execute a variety of innovative marketing plans to deliver new products to those engineers."

According to both companies, Mouser and Texas Instruments will work hand-in-hand to coordinate the availability of new products, ensuring design engineers will have an easy-to-use, authorized channel to obtain TI's newest products with no minimum order quantity and same-day shipping.
