## PLATO TIP CARE

### Tip Tin

Plato's LEAD FREE Tip Tinner TT-95 is a fast, efficient, and safe means of re-tinning tips. This thermally-stable compound is residue free and ESD and environmentally safe. A well tinned soldering tip improves operator performance and satisfaction. Plato's Tip-Tin provides improved cleaning and re-tinning of highly oxidized soldering iron tips safely and efficiently.

- Lead Free
- ESD Safe
- Easy to Use
- Fast Response
- Environmentally Safe
- Residue Free

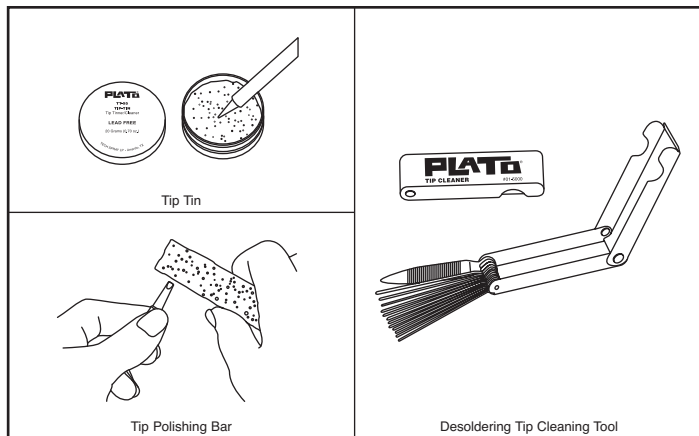

### Tip Polishing Bar

The inexpensive Plato® Polishing Bar restores detinned tips for additional service. Normally, detinned tips (those unable to hold solder) are discarded. If the tips are not pitted or worn, buffing with the Plato® Polishing Bar will clean the tips and restore new life.

### Desoldering Tip Cleaning Tool

This handy maintenance tool is used to remove unwanted solder and flux "build-up" from desoldering tip ID'S and from solder collector paths. Just select the proper diameter rod from the Plato® tool and push out any unwanted loose particles or solder from the desolder tip or collector path. Proper daily maintenance of all desoldering equipment minimizes premature tip clogging and will ensure improved performance.
