Products may be RoHS compliant. Check mouser.com for RoHS status.

## USB INTERFACE MODULES

The Linx QS Series USB module allows the rapid addition of USB to virtually any device. Housed in a compact SMD package, the module provides a complete solution for converting between USB and serial sources, including microprocessors, RS-232 / RS-485 level converters, or RF modules.

## REMOTE CONTROL AND COMMAND ICs

Linx offers a wide range of ICs designed to simplify such diverse tasks as encoding and decoding, interface, and discreet RF implementations. Linx ICs offer a range of unique features and the availability of Cipherlinx encryption for applications requiring high security.

### High Security Encrypted Remote Control Encoder and Decoder ICs

For quantities of 100 and up, call for quote.

## OEM PRODUCTS

Linx pre-certified OEM products save you time and money by eliminating design, certification and tooling costs. They are ideal for remote control or command applications where the user would press a button on one end and perform an action on the other end.
