## DIGI CONNECT ME® FAMILY WIRED AND WIRELESS EMBEDDED MODULES

The industry's first interchangeable secure wired and wireless embedded modules with plug-and-play functionality and comprehensive development tools make it easy to add embedded web-enabled wired and wireless network connectivity. Based on a unique common platform design approach, the Digi Connect® ME and Digi Connect® Wi-ME embedded modules offer complete "drop-in" integration. This allows you to build future-proof products based on a single design supporting secure wired 10/100Base-T and 802.11b wireless Ethernet connectivity. The family of Digi Connect® embedded modules makes all of this possible without the traditional complexities of hardware and software integration work, and at a fraction of the time and cost required to create custom solutions.

For quantities of 50 and up, call for quote.

## DIGI CONNECT WI-ME™

The Digi Connect Wi-ME (Wireless Micro Embedded) is a fully customizable and secure 802.11b wireless device server. It is based on the common platform design approach of the Digi Connect family of embedded products, which minimizes design risk and reduces time to market by allowing customers to easily accommodate both wired and wireless network functionality in a single future-proof product design.

For quantities of 50 and up, call for quote.

## DIGI CONNECT WI-WAVE

Built on Digi's own 802.11b/g wireless LAN technology, Digi Connect Wi-Wave is the industry's first off-the-shelf WLAN radio card specifically designed to meet the long-term product availability and specific operating temperature requirements of embedded designs and their extended product life cycles.

For quantities of 50 and up, call for quote.

## DIGI CONNECT EM™

The Digi Connect EM (Embedded Module) device server delivers true Web-enabled device networking that is easy and cost-effective to implement, while being powerful enough to meet future performance needs. Built on leading 32-bit ARM technology using the network-attached NetSilicon NS7520 microprocessor and featuring a wide variety of connectivity options, the Digi Connect EM provides the freedom and flexibility of complete custom product development.

For quantities of 50 and up, call for quote.

## DIGI CONNECT SP® MODULE

The Digi Connect SP (Single Port) device server is the ideal platform for your custom web- and network-enabled embedded applications. Combining Digi and Net Silicon technology, it eliminates the hardware design effort and delivers a true device networking.

For quantities of 50 and up, call for quote.

## CONNECTCORE 9P 9215

The ConnectCore 9P 9215 module delivers a powerful, secure, and compact network-enabled 150 MHz NS9215 processor solution with ARM9 core, a rich set of peripherals and unique interface flexibility. With leading features like an on-chip AES encryption engine, two independent and fully programmable flexible interface modules and Digi's patented dynamic power management options, it is the ideal solution for today's networked embedded applications. ConnectCore Wi-9P 9215 is the industry's first 802.11a/b/g embedded core module for secure wireless networking and integrated application processing. The ConnectCore Wi-9P 9215 is pre-certified for 802.11a/b/g networking by the FCC in North America and other regulatory organizations in Europe and Japan. The ConnectCore Wi-9P 9215 features two Flexible Interface Modules (FIMs) built into Digi's ARM9 microprocessor that allow customers to use application-specific interfaces such as Secure Digital, Controller Area Network (CAN), 1-Wire, additional UARTs and others.

For quantities of 50 and up, call for quote.
