

# QUATECH Wireless Device Servers and Modules

Products may be RoHS compliant. Check mouser.com for RoHS status.

## AIRBORNE™ EMBEDDED WIRELESS MODULES, RADIOS AND DEVELOPMENT KITS

Quatech's New Airborne™ Enterprise Class Products are the first in the industry to provide WPA2-Enterprise Class Extensible Authentication Protocols (EAP) with support for authentication Certificates. The module provides Wireless Serial Device Server or Ethernet-to-Wireless Bridge functionality and is designed to meet extended operating temperature range (-40°C to +85°C).

<a href="#">600-WLRG-RA-DP101</a>	WLRG-RA-DP101	802.11b/g Wireless CF Radio Module	42.00	40.91

## AIRBORNE™ ENTERPRISE EXTERNAL WIRELESS DEVICE SERVERS AND ETHERNET BRIDGES

Airborne™ is a family of fully integrated 802.11b/g wireless LAN bridge and device server products designed specifically to provide wireless LAN and Internet connectivity to industrial, scientific, medical and automotive applications. Convenient features include compact form factor, low power consumption and advanced security including LEAP, WPA, WPA2 and WEP standard encryption.

## AIRBORNE™ 802.11 EMBEDDED BOARDS

The Airborne Enterprise Wireless Device Server Boards create a connection between an 802.11b/g wireless LAN and a device with a serial port. The Device Server Boards are all single-port units available with one RS-232 port or one RS-232/422/485 port. The Airborne Ethernet Bridge Boards create a connection between an 802.11 wireless LAN and a device with an Ethernet port. The Device Server and Ethernet Bridge Boards do not include enclosure, cable, external power and antenna.

## USB 2.0 SERIAL ADAPTERS

Quatech USB Adapters are reliable solutions for a wide variety of commercial uses. Moving beyond the desktop, USB offers a universal solution for device connectivity. Quatech's wide range of USB adapters feature High Speed USB 2.0 and data rates up to 921.6 kbps.

For quantities greater than listed, call for quote.
