

# **Engineering Development/Design Sample Kits**

# **CST206K**

#### **Description:**

This kit contains representative samples of our high frequency current sense transformers. They are useful for a variety of developmental needs including circuit simulation, circuit testing, prototyping and agency evaluations. All items in this kit meet specifications listed in the catalog section referring to the product. This kit is housed in an easy to see, easy to store clear polycarbonate box with a convenient snap closing hinged lid.
