Broadcast
Solutions

Broadcast Solutions

Amphenol Connex is an industry leading supplier of RF connectors, cable assemblies and adapters servicing a diverse customer base worldwide. Our high-quality, yet cost effective 75 ohm BNC and 1.0/2.3 DIN product range is ideal for high performance broadcast video applications requiring data transfer rates of 3 Gb/s or more. Standard off-the-shelf solutions are available from inventory and custom solutions can be developed, sampled and proven within just a few short weeks.

Contact us today for your next Broadcast Solution.

The BNC product line is a miniature, quick connect/disconnect RF connector. It features two bayonet lugs on the female connector, and locking is achieved with a quick quarter-turn of the coupling nut.

BNCs are ideally suited for cable termination of miniature and subminiature coaxial cable. BNCs are designed to accommodate a large variety of industry-standard cables, including all standard 75 Ohm broadcast video cables offered by popular manufacturers.

Our BNC product line includes cable mount connectors with crimp attachments, PCB mount and panel mount / bulkhead receptacles, adapters, terminators, and tooling.

Features & Benefits

- Industry standard for over 50 years
- Innovative bayonet coupling system ensures positive locking and allows quick and easy mating and un-mating of connectors
- True 75 ohm connectors are designed to meet SMPTE return loss requirements
- Durable high temperature PTFE insulators and low-cost Delrin dielectrics are available
- Broad product line. Many options and features available with stock available.

Common Applications

- High performance broadcast applications including video routing and distribution, content management and storage.
- Instrumentation and test applications

ELECTRICAL SPECIFICATIONS

Impedance	75 Ohms
Frequency Range	0 to 4 GHz
Working Voltage	500 Volts
Dielectric Withstanding Voltage	1500 Volts
VSWR	Typically 1.15:1 or better at 3 Ghz. Contact the factory
Contact Resistance	Center Contact: 1.5 Milliohms Max
	Outer Contact: 1.0 Milliohms Max
Insulation Resistance	5000 Megohms Min

MATERIAL SPECIFICATIONS

Component	Material	Finish
Center Contact – Male	Brass Alloy	Gold
Center Contact – Female	Beryllium Copper or Phosphor Bronze	Gold
Coupling Nut and Body	Brass or Zinc Die Cast	Nickel or Gold
Dielectric	PTFE or Delrin	Natural
Gaskets	Silicone Rubber	Red
Crimp Ferrule	Annealed Copper	Nickel

Our comprehensive line of 75 Ohm 1.0 /2.3 DIN Coaxial Connectors are ideal for use in high-performance 3Gb/s HD/SDI video applications. DIN Connectors are smaller in size than the BNC connectors commonly used in the broadcast industry, allowing up to four times as many signals in the same area.

DIN Connectors feature an innovative push-pull coupling mechanism that allows for quick and easy mating/un-mating. Amphenol Connex's DIN connectors feature a precision-machined, nickel-plated brass body, while the inner/outer contacts feature gold-over-nickel plating. Crimp plugs and jacks are available for cables commonly used in the broadcast and video industry.

Our DIN connector product line includes cable mount plugs and jacks. Bulkhead mounting options are available. Vertical and right angle PCB mount receptacles are also available.

Features & Benefits

- Innovative push-pull coupling mechanism allows quick and easy mating and un-mating
- 75 Ohm versions operate to 3+ GHz and meet the SMPTE return-loss requirements
- Complies with DIN 41626, DIN 47297, INFC 93569, INFC 93571 and CECC 22230 requirements
- Ideal for high-density applications where space is limited

Common Applications

- High-definition video routers (3 Gb/s applications)
- Audio/video switching devices
- Digital video recorders and playback systems
- Mobile video units

ELECTRICAL SPECIFICATIONS

Amphenol Connex offers a wide range of 75 ohm BNC and 1.0/2.3 DIN coaxial adapters. In-series adapters, often used to change gender, are available. Additionally, between series adapters in a variety of configurations are available.

The adapters in this section are designed for high performance video applications and offer low return loss for fast 3 Gb/s data transfer rates. Various mounting features and custom solutions are also available.

UNIVERSAL HAND CRIMP TOOLS

Amphenol Connex 47 Series Crimp Tools utilize industry standard crimp die set dimensions. Tool handle can be purchased separately or with die set installed. Die sets listed below will terminate all popular coaxial cables. Full ratchet crimp action assures a complete crimp before tool releases. Call Amphenol Connex for custom die configurations.
