

## Zero Charge Anti-Stat Coating

1726

Techspray's ESD-safe products can help maintain work areas within the ANSI/ESDS20.20 standards set by the ESD Association ([www.esda.com](http://www.esda.com)). In a static-free environment, the work area, tools and personnel form a circuit (see diagram to right). Electrostatic Discharge (ESD) occurs when the charges of two surfaces with a large electronic potential (difference) equalize instantaneously. The resulting discharge or spark can cause catastrophic or latent damage to electronic components. ESD programs maintain an equal potential by maintaining continuous contact with ground, avoiding ESD damage. Cleaners, lotions, and coatings are an integral part of an ESD control program.

### Fast drying anti-static coating

Fast drying, anti-static coating eliminates static charge and reduces triboelectric generation from flexible surfaces. Ideal for plastics, fabrics, and carpet.

- All-purpose static control
- Non-flammable
- Non-ozone depleting
- For plastics, fabrics, and carpet
- Fast drying

Specifications:

- Meets or exceeds MIL-B-81705B
- NFPA 56A.
- USDA: approved A-4 rated

## Technical Information

### Chemical & Physical Properties

Appearance	Clear, colorless liquid
Odor	Pleasant
Flash Point	none
VOC (EPA)	58.14 g/l
Boiling Point	100°C (212°F)
Density	0.978 at 25°C

### Chemical Composition

CHEMICAL NAME	CAS #
Ethylbis (hydroxyethyl) tallow alkyl, ethoxylated, Et sulfates	68071-95-4
Ethanol	64-17-5
2-Propanol	67-63-0
Methanol	67-56-1

## Environmental Policy

Techspray is committed to developing products to ensure a safer and cleaner environment. We will continue to meet and sustain the regulations of all federal, state and local government agencies.

## Resources

Techspray products are supported by a global sales, technical and customer services resources.
