Get to know the DEVKIT-S12G128

The DEVKIT-S12G128 is an ultra-low-cost development platform for S12 Microcontrollers.

Features include easy access to all MCU I/O's, a standard-based form factor compatible with the Arduino™ pin layout, providing a broad range of expansion board options, and an USB serial port interface for connection to the IDE, the board has option to be powered via USB or an external power supply.

REF	POSITION	DESCRIPTION
J11	OPEN	Enable LIN Master mode
J13	1 - 2	VDD Power MCU linked to 3.3V
	2 - 3	VDD Power MCU linked to 5.0V
	[DEFAULT]	
J17	2 - JP1	VDD Power MCU linked to USB
	1 - 2	P5V0 reference is linked to P5V_SWUSB
	[DEFAULT]	P5V0 reference is linked to P5V_SBC

CAUTION:

When powered from the USB bus, do not exceed the 500mA maximum allowable current drain. Damage to the target board or host PC may result.

Step-by-Step Installation Instructions

In this quick start guide, you will learn how to set up the **DEVKIT-S12G128** board and run the default exercise.

1

Install Software and Tools

Install CodeWarrior Development Studio for S12 V5.1 or later. [CodeWarrior Dev Tools for HCS12\(X\) MCUs](#)

2

Connect the USB Cable

Connect one end of the USB cable to the PC and the other end to the mini-B connector on the DEVKIT-S12G128 board. Allow the PC to automatically configure the USB drivers if needed.

3

Using the Example Project

The pre-loaded example project utilizes the RGB LED. Once the board is plugged in you can see how the RGB LEDs change the color.

CAUTIONARY NOTES

- Electrostatic Discharge (ESD) prevention measures should be used when handling this product. ESD damage is not a warranty repair item.
- NXP does not assume any liability arising out of the application or use of any product or circuit described herein; neither does it convey any license under patent rights or the rights of others.
- EMC Information on the DEVKIT-S12G128 board:
 - This product as shipped from the factory with associated power supplies and cables, has been verified to meet with requirements of CE and the FCC as a CLASS A product.
 - This product is designed and intended for use as a development platform for hardware or software in an educational or professional laboratory.
 - Attaching additional wiring to this product or modifying the products operation from the factory default as shipped may effect its performance.
