### Installation and Panel Cutout

The technical drawings include:

- Top View:** Shows overall dimensions of 4.04" (102.5mm) width and 3.59" (91.2mm) height.
- Panel Cutout:** A hatched rectangle with dimensions 1.77" (45mm) height and 3.62" (91.9mm) width.
- Front View:** Shows a width of 3.78" (96mm) and a height of 1.89" (48mm).
- Side View:** Shows a depth of 0.51" (13mm), a mounting hole offset of 2.94" (74.7mm), and a mounting hole diameter of 1.74" (44.2mm). The total depth of the meter is 2.28" (57.9mm).
- 3D View:** Shows the meter with an arrow pointing to the "Engineering Label" on the right side.

**Mounting Requirements**  
The Falcon series 1/8 DIN indicators require a panel cutout of 1.77" (45mm) high by 3.62" (91.9mm) wide. To install the Falcon into a panel cutout, remove the clips from the side of the meter. Slide the meter through your panel cutout, then slide the mounting clips back on the meter. Press evenly to ensure a proper fit. Tighten screws.

**Engineering Label Placement**  
If replacement of the engineering unit label is required, place the tip of a ball-point pen into the small hole at the base of the engineering label in the bezel. Slide the label up until it pops out. Grasp and remove. Slide the new label half the distance in, then use the ball-point pen to slide it down into place.
