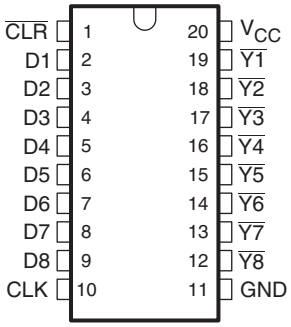
8-BIT OPEN-COLLECTOR SINK DRIVER WITH LATCH

FEATURES

- **LBC3S (Lin BiCMOS) Process**
- **High Voltage Output (V_{OUT} = 24 V)**
- **Output Current (I_{OL} Max = 40 mA)**
- **Latch-Up Performance Exceeds 250 mA Per JEDEC Standard JESD-17**
- **ESD Protection Exceeds JESD 22**
  - **2000-V Human Body Model (A114-A)**
  - **200-V Machine Model (A115-A)**
  - **1000-V Charged Device Model (C101)**

N OR PW PACKAGE
(TOP VIEW)



DESCRIPTION

The TLC59212 is an 8-bit open-collector driver with latch designed for 5-V V_{CC} operation.

These circuits are positive-edge-triggered D-type flip-flops with a direct clear ($\overline{CLR}$) input. Information at the data (D) input meeting the setup time requirements is transferred to the $\overline{Y}$ output on the positive-going edge of the clock (CLK) pulse. Clock triggering occcurs at a particular voltage level and is not directly related to the transition time of the positive-going pulse. When CLK is at either the high or low level, the D-input has no effect at the output.

The TLC59212 is characterized for operation from –40°C to 85°C.

ORDERING INFORMATION(1)

T_A	PACKAGE(2)		ORDERABLE PART NUMBER	TOP-SIDE MARKING
–40°C to 85°C	PDIP – N	Reel of 1000	TLC59212IN	Y59212
	TSSOP – PW	Reel of 2000	TLC59212IPWR	Y59212

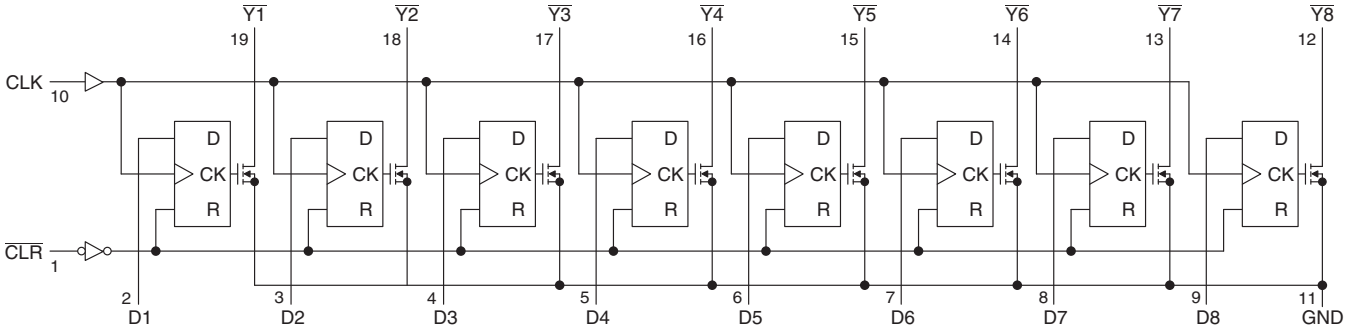
(1) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI web site at www.ti.com.
(2) Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.

FUNCTION TABLE (EACH LATCH)(1)

INPUTS			OUTPUT $\overline{Y}$
$\overline{CLR}$	CLK	D	
L	X	X	H*
H	↑	L	H*
H	↑	H	L
H	L	X	Y_0
H	↓	X	Y_0

(1) L: Low-level
H: High-level
H*: with pullup resistor
X: Irrelevant
↑: Rising edge
↓: Falling edge
Z : High-impedance (OFF)

LOGIC SYMBOL[1]



(1) This symbol is in accordance with ANSI/IEEE Standard 91-1984 and IEC Publication 617-12.

ABSOLUTE MAXIMUM RATINGS[1]

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
V_{CC}	Supply voltage range		–0.5	7	V
D	Input voltage range	D, CLK, $\overline{CLR}$	–0.5	7	V
V_O	Output voltage range	H output	–0.5	30	V
I_O	Output current range	1 bit for output low		40	mA
I_{IK}	Input clamp current	V_I < 0 V		–20	mA
θ_{JA}	Package thermal impedance[2]	N package		69	°C/W
		PW package		83	
T_A	Operating free-air temperature range		–40	85	°C
T_{stg}	Storage temperature range		–65	150	°C

(1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) The package thermal impedance is calculated in accordance with JESD 51-7.

RECOMMENDED OPERATING CONDITIONS

V_{CC} = 4.5 V to 5.5 V

		CONDITIONS	MIN	MAX	UNIT
V_{CC}	Supply voltage		4.5	5.5	V
V_{IH}	High-level input voltage		V_{CC} × 0.7	V_{CC}	V
V_{IL}	Low-level input voltage		0	V_{CC} × 0.3	V
V_O	Output voltage		0	24	V
I_O	Output current	Duty cycle < 100%	0	40	mA
T_A	Operating free-air temperature		–40	85	°C

ELECTRICAL CHARACTERISTICS

over recommended operating free-air temperature range (unless otherwise noted)

PARAMETER		TEST CONDITIONS		MIN	TYP	MAX	UNIT
V_{t+}	Positive-going input threshold	D, $\overline{CLR}$, CLK				3.5	V
V_{t-}	Negative-going input threshold	D, $\overline{CLR}$, CLK		1.5			V
V_t	Hysteresis	D, $\overline{CLR}$, CLK		0.5		2	V
$V_{O(off)}$	Output tr sustain voltage	I_{ce} = 1 mA		24			V
I_{OZ}	Output tr leakage current	V_O = 24 V			0	5	µA
I_{IH}	High-level input current	V_{CC} = 5.5 V, V_I = 5.5 V			0	1	µA
I_{IL}	Low-level input current	V_{CC} = 5.5 V, V_I = 0 V			0	–1	µA
I_{off}	Leakage current	V_I = 0 to 5 V, V_O = 0 to 30 V, V_{CC} = 0			0	5	µA
I_{CC}	Supply current	V_I = 0 to 5 V, V_O = 0 to 30 V, V_{CC} = 0	Output = all OFF		0	5	µA
			Output = all ON		8	20	
V_{OL}	Low-level output voltage	V_{CC} = 4.5 V, I_O = 40 mA			0.32	0.55	V
r_{ON}	ON-state resistance	V_{CC} = 4.5 V, I_O = 10 mA			8	13	Ω
C_i	Input capacitance	V_I = V_{CC} or GND			5		pF

SWITCHING CHARACTERISTICS

over operating free-air temperature range (unless otherwise noted), see Figure 1

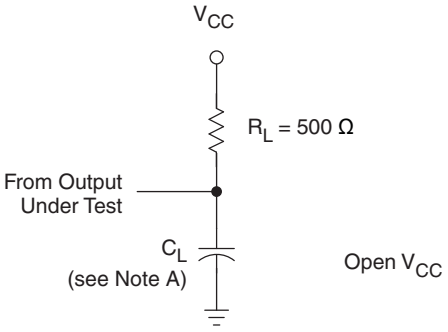
PARAMETER	TEST CONDITIONS	LOAD CAPACITANCE	T_A = 25°C			T_A = –40°C to 85°C		UNIT
			MIN	TYP	MAX	MIN	MAX	
t_{TLH}	Output = low to high	C_L = 50 pF, R_L = 500 Ω		60	185		185	ns
t_{THL}	Output = high to low	C_L = 50 pF, R_L = 500 Ω		10	185		185	ns
t_{PLH}	Output = low to high	C_L = 50 pF, R_L = 500 Ω		70	210		250	ns
t_{PHL}	Output = high to low	C_L = 50 pF, R_L = 500 Ω		45	210		250	ns
t_{PHLR}	$\overline{CLR}$-$\overline{Y}$	C_L = 50 pF, R_L = 500 Ω		70	210		250	ns

TIMING REQUIREMENTS

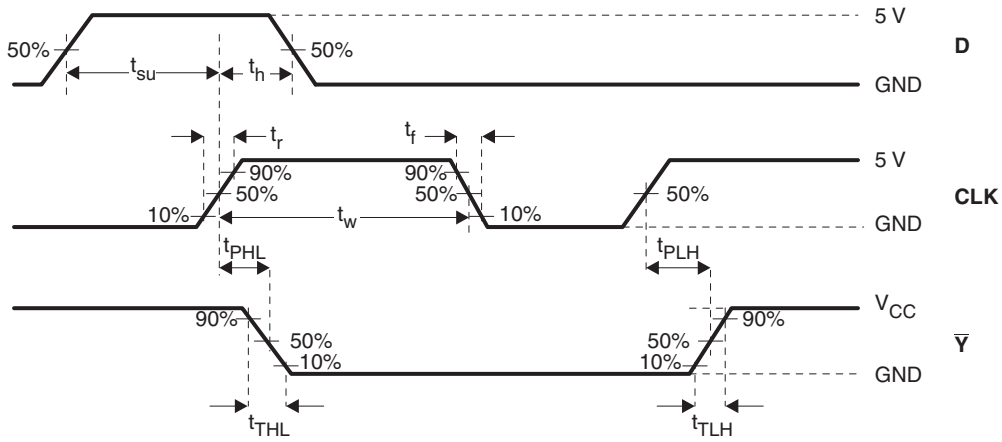
over recommended operating free-air temperature range, V_{CC} = 4.5 V to 5.5 V, O/C to Y (unless otherwise noted)

PARAMETER			TEST CONDITIONS	T_A = –40°C to 85°C		UNIT
				MIN	MAX	
t_{su}	Setup time	CLK	V_{DD} = 4.5 V to 5.5 V	5		ns
t_h	Hold time	CLK	V_{DD} = 4.5 V to 5.5 V	15		ns
t_w	Pulse width	CLK, $\overline{CLR}$	V_{DD} = 4.5 V to 5.5 V	20		ns

PARAMETER MEASUREMENT INFORMATION



LOAD CIRCUIT FOR OPEN-COLLECTOR OUTPUT



VOLTAGE WAVEFORMS

A. C_L includes probe and jig capacitance.

B. Waveform 1 is for an output with internal conditions such that the output is low except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high except when disabled by the output control.

C. All input pulses are supplied by generators having the following characteristics: PRR ≤ 1 MHz, Z_O = 50 Ω, t_r ≤ 3 ns, and t_f ≤ 3 ns.

D. The outputs are measured one at a time with one transition per measurement.

E. t_{PLH} and t_{PHL} are the same as t_{pd}.

Figure 1. Test Circuit and Voltage Waveforms

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish	MSL Peak Temp (3)
TLC59212IN	ACTIVE	PDIP	N	20	20	Pb-Free (RoHS)	CU NIPDAU	N / A for Pkg Type
TLC59212IPWR	ACTIVE	TSSOP	PW	20	2000	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM

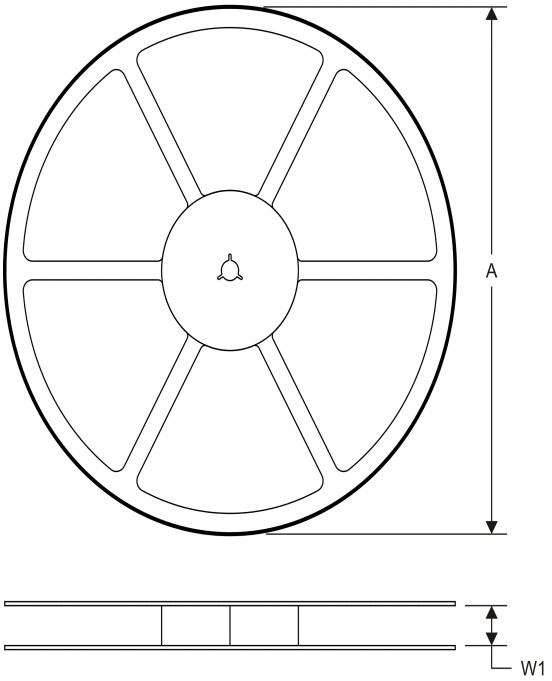
(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

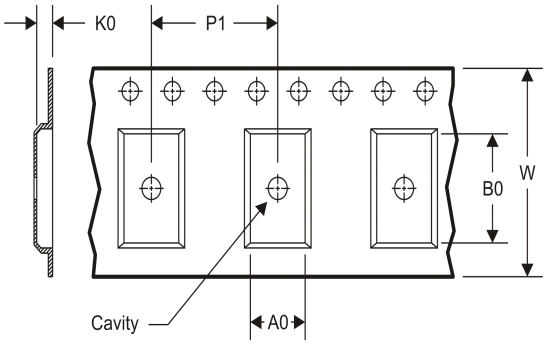
(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

TAPE AND REEL INFORMATION

REEL DIMENSIONS



TAPE DIMENSIONS



A0	Dimension designed to accommodate the component width
B0	Dimension designed to accommodate the component length
K0	Dimension designed to accommodate the component thickness
W	Overall width of the carrier tape
P1	Pitch between successive cavity centers

TAPE AND REEL INFORMATION

*All dimensions are nominal

Device	Package Type	Package Drawing	Pins	SPQ	Reel Diameter (mm)	Reel Width W1 (mm)	A0 (mm)	B0 (mm)	K0 (mm)	P1 (mm)	W (mm)	Pin1 Quadrant

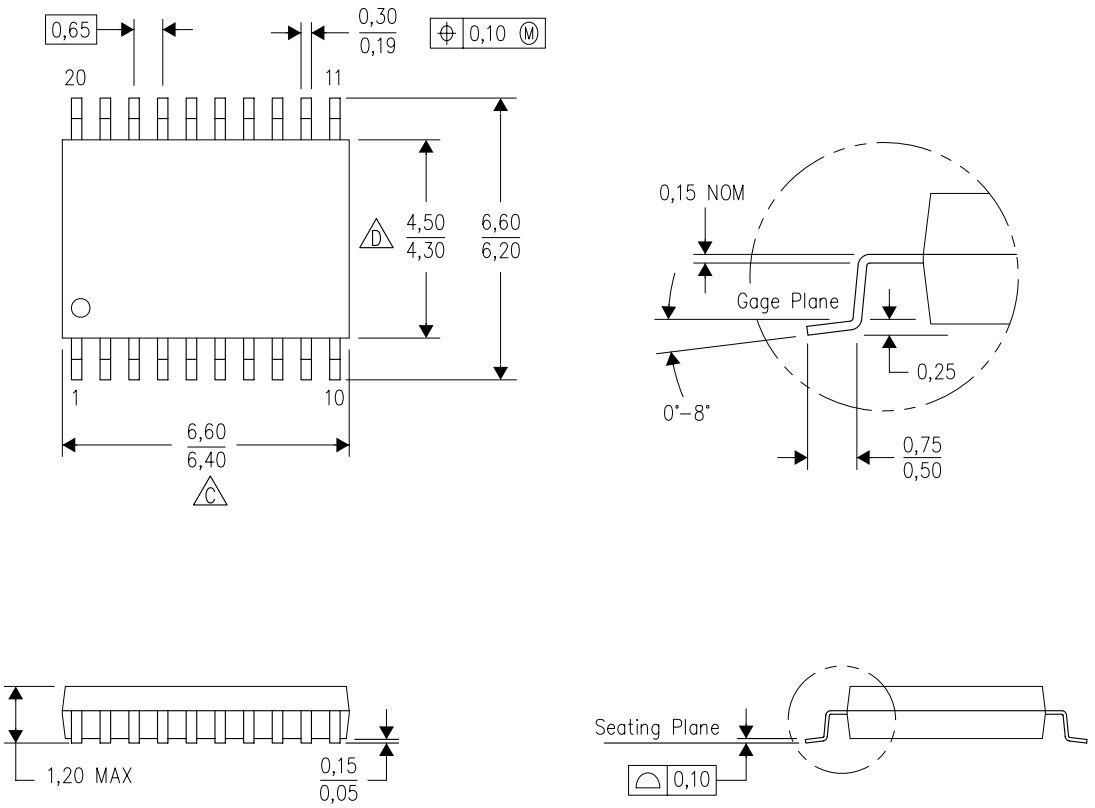
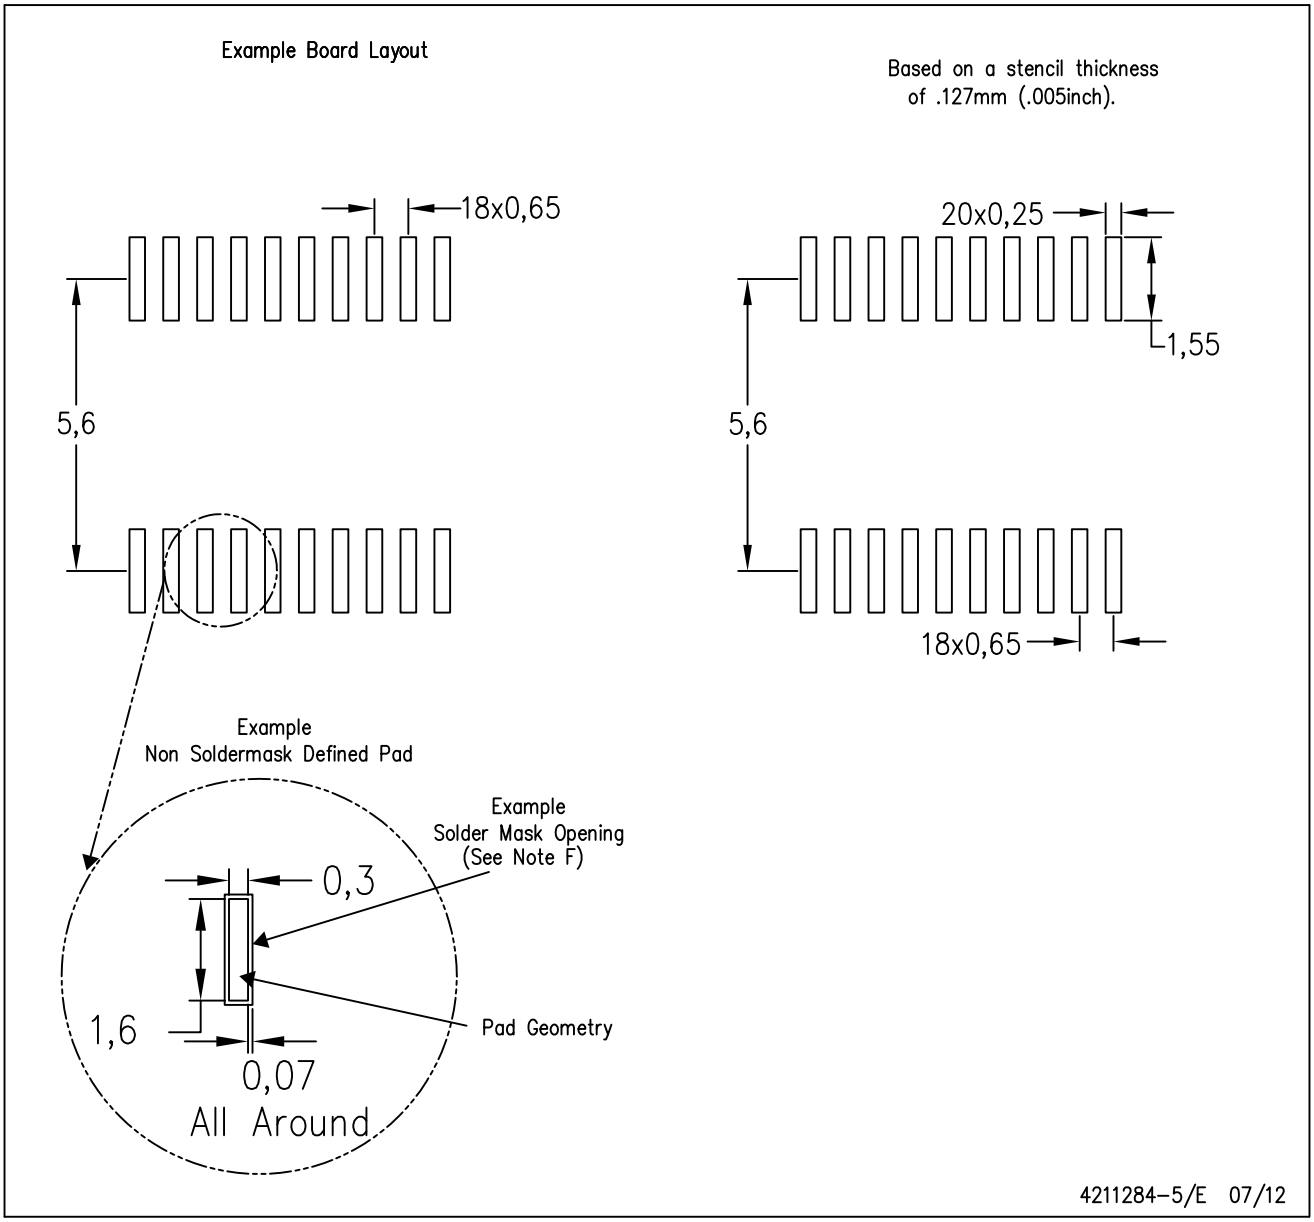
PW (R–PDSO–G20) PLASTIC SMALL OUTLINE



4040064–5/G 02/11

NOTES:
A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M–1994.
B. This drawing is subject to change without notice.
C. Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0,15 each side.
D. Body width does not include interlead flash. Interlead flash shall not exceed 0,25 each side.
E. Falls within JEDEC MO–153

PW (R–PDSO–G20) PLASTIC SMALL OUTLINE



NOTES:
A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Publication IPC–7351 is recommended for alternate design.
D. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC–7525 for other stencil recommendations.
E. Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46C and to discontinue any product or service per JESD48B. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as “components”) are sold subject to TI’s terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI’s terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers’ products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers’ products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI’s goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or “enhanced plastic” are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have ***not*** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components which meet ISO/TS16949 requirements, mainly for automotive use. Components which have not been so designated are neither designed nor intended for automotive use; and TI will not be responsible for any failure of such components to meet such requirements.
