LUMAWISE LED Holders

Type Z50 LED holder for CREE CXA Arrays

The TE Solderless LED Holder, Type Z50, is a circular LED holder that provides a quick and easy solderless connection to the CREE CXA arrays. TE’s Type Z50 holder allows the direct attachment of CREE CXA LEDs to a heat sink using standard screws, which enables designs to be easier to use, and faster to market. The Type Z50 reduces assembly costs and provides a quality solderless power connection, secure mechanical attachment, proper thermal hold down forces, and a landing zone with attachment features for additional secondary optics.

KEY FEATURES

• Snap-in LED retention feature simplifies installation by securing the LED to the holder before mounting
• Poke-in wire connection eliminates time consuming soldering to the LED
• Enables constant thermal down force to minimize influence by thermal plastic deformation at high temperature
• Makes easy and clean thermal paste application possible with built-in excess paste overflow feature
• Provides a specified and stable landing area for additional secondary optics
• Optional alternate mechanical optic attachment accessory
• Minimalistic aesthetic design with clear polarity indication to aid assembly
• Mechanically strong and robust design with negligible light interference
• Available optics from Carclo and LEDIL

MECHANICAL

• Operating temperature range -40 to 105°C
• Utilize a minimum screw size of #4 or M3 for attachment
• Poke-in style electrical contacts supporting 18-22 AWG (0.35 - 0.75mm²) solid, fused and stranded wire
• Z50 w/ optics attach: 50mm diameter by 6mm high
• Z50 low profile: 45mm by 3.4mm high
• Enables compliancy to Zhaga book 3 standard

ELECTRICAL

• Current rating: 5A
• Voltage rating: 300 VDC
• UL1977 and CSA recognized component (cUR)
• IEC 60838-2-2 (up to 60VDC max)

MATERIALS

• High mechanical strength
• High heat resistance
• Good electrical properties
• UL94V-0 flammability rating
