

August 29, 2013

Dear Valued Customer,

On August 28, 2013, TT electronics announced plans to transition its (Variables, FR) product lines from Fullerton, CA, USA, to its manufacturing sites in Mexicali, Mexico. These transitions will be completed by the end of 2014. We currently plan to continue to produce all of the products which are being transitioned from Fullerton.

The product ranges manufactured in the Fullerton facility from our Power and Hybrid business unit (microelectronics) are unaffected by this change. and will continue to be manufactured in the facility for the foreseeable future.

If you have any further questions, please contact your sales representative for more details and inquiries.

Sincerely,

Craig Askew  
TT Electronics  
Power and Hybrid Business Unit
