

A new approach For Industrial applications:

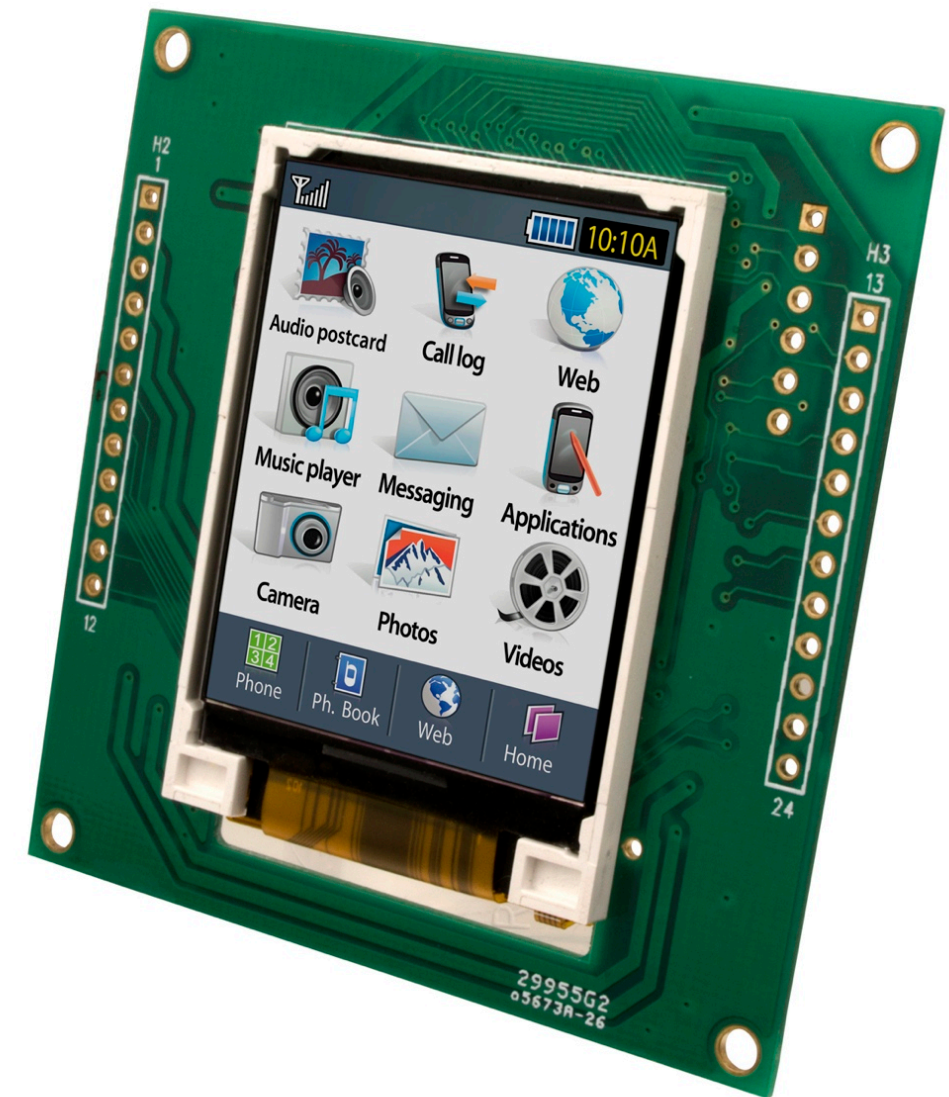

Integrated TFT Modules

Displaytech | AMERICAS
a seacomp company

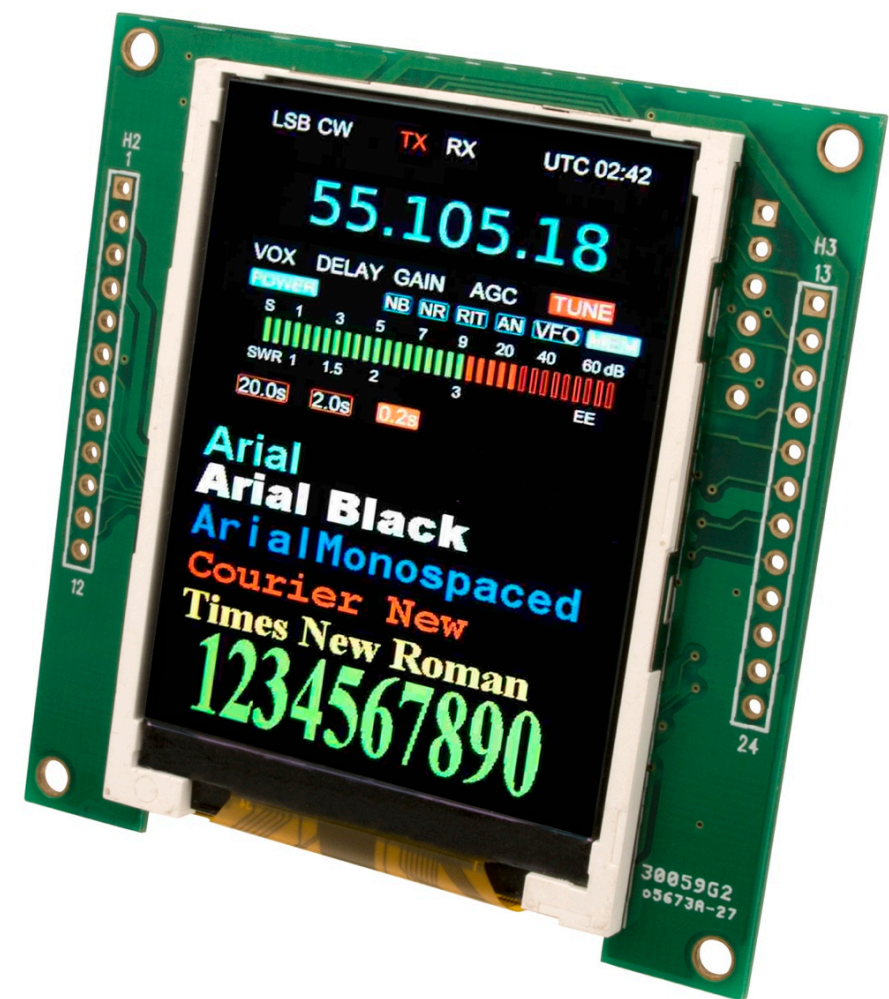

basic Int Board facts

- The integrated board is a revolutionary approach designed to eliminate many of the difficulties customers face in the vastly complex world of displays.
- Sizes ranging from 1.8" to 7"
- Resistive touch capabilities available
- Presents clear mechanical, electrical, and fiscal advantages.

Mechanical Advantages

- DIL (Dual In Line) pins for familiar interface
- Optional FFC connection
- Constant dimensions
- Mounting holes for easy assembly

electrical Advantages

- On-board controller
- Consistent software interface
- PWM circuit for backlight
- Self initializing

Fiscal

- Continuity of supply
- Lower engineering costs
- Reduced time to market
