

New ERZ-E8 Series

Radial Leaded Disc ZNR[®] Transient / Surge Absorber (MOV)

Performance of a 10mm Device in an 8mm Size for Drop-In Replacement!

Panasonic, a worldwide leader in Circuit Protection Products, is pleased to introduce the **NEW ERZ-E8 Series Radial Leaded Disc ZNR[®] Transient/Surge Absorbers** to our already outstanding ZNR[®] product line. ZNR[®] stands for **Z**inc-oxide **N**on-linear **R**esistor, also commonly known as Metal Oxide Varistor or MOV. Panasonic invented the ZNR[®] Surge Absorber in 1968 and is a pioneer in the use of Zinc Oxide as a Surge Absorber. ZNR[®] devices are used to protect electronic equipment against voltage surges and save board space and cost. The **NEW ERZ-E8 Series** offers a finer, more uniform grain structure which facilitates enhanced performance while allowing for size reduction. Offering voltages ranging from 200 to 750V, the **ERZ-E8 Series** has the performance of a conventional 10mm diameter device in an 8mm diameter size, all with the same lead spacing for a true drop-in 10mm replacement.

Features

- Voltage Range: 200 to 750V
- Smaller 8mm Diameter than the 10mm ER-ZV10Dxxx
- Same Lead Spacing of ER-ZV10Dxxx
- Same Electrical Performance
- Agency Recognition (UL/VDE)
- RoHS Compliant

Benefits

- Save PCB Space
- More Affordable than 10mm Alternatives
- Facilitates Agency Equipment Approval
- Drop-in 10mm Replacement

Industries

- Industrial Machinery
- Test and Measurement
- Control Systems
- Communications
- Consumer Electronics

Applications

- Power Supply Input Protection
- Relay Protection
- Solenoid Valve Protection
- Semiconductor Protection

Part Number Information

Symbol	Lead Configuration	Packaging
A	Straight	Bulk
B	Crimped Lead	Bulk
E	Straight	Taped
F	Crimped Lead	Taped

The first two digits are significant figures and the third one denotes the number of zeros following.

Additional Information
