

## PRODUCT DATASHEET Strada-SQ series

last update 28/9/2012

Ordering number C12410

C12410\_STRADA-SQ-A-T Description

**FWHM** Strada-SQ Asym degrees Family Efficiency 93 % Type Lens LED XM-L cd/lm Gerber File Available

Color Clear Diameter 25 + 25 mm Height 9 mm

Positioning: External position element / Automatic assembling li Style Square

**PMMA** Optic Material Holder Material

Fastening Screw, glue Status Ready

Ordering number CA12411

Description CA12411\_STRADA-SQ-A-T

Strada-SQ **FWHM** Asym degrees Family Lens Efficiency 93 % Type LED XM-L cd/lm 0.510 Color Clear Gerber File Available

Diameter 25 + 25 mm Height 9.15 mm

Style Square Optic Material **PMMA** 

Holder Material Fastening

Screw, tape Status Ready

Positioning: External position element / Automatic assembling li

## PRODUCT DATASHEET Strada-SQ series last update 28/9/2012

NOTE: The typical divergence will be changed by different color, chip size and chip position tolerance. The typical total divergence is the full angle measured where the luminous intensity is half of the peak value.

## PRODUCT DATASHEET Strada-SQ series

**CREE**

## **GENERAL INFORMATION**

- Product series especially designed & optimized for XM-L series of LEDs.
- Special care taken to make light distribution as uniform as possible.
- Fastening to heat sink with a PU foam adhesive tape of automotive grade. Please find fastening details by clicking link: http://www.ledil.com/datasheets/DataSheet\_TAPE.pdf
- Fastening to PCB with appropriate adhesive. By clicking link below you can find Ledil recommended glue options.

NOTE 1: We advise customer to ensure the suitability and sufficiency of the bond in the end product. For example, mechanical stress, vibration and holes on the surface of the circuit boar weaken the strength of the tape.

NOTE 2: Assembly to the surface must be made straight, so the tape bonds constant and balanced with fastening surface. Slanted assembly might cause unbalanced bond to the surface. All surfaces where tape is applied must be clean, dry and free from grease and dirt.

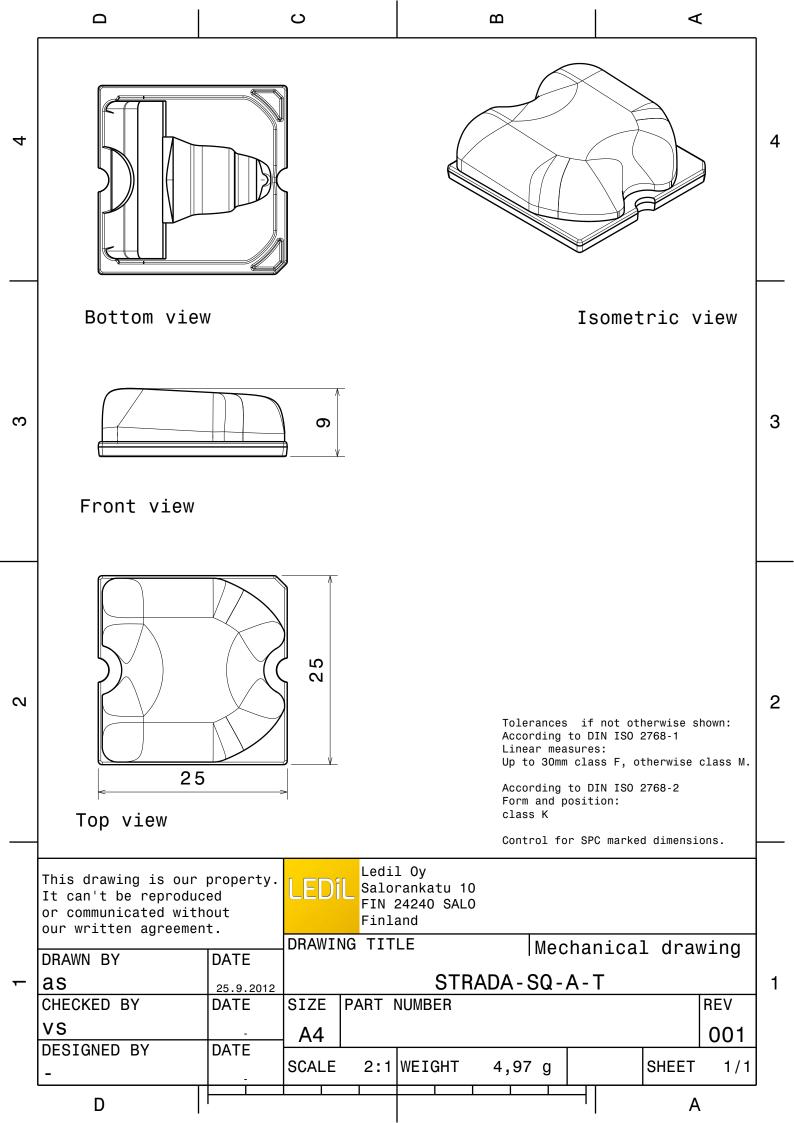

If cleaning of PCB surfaces is needed, please follow strictly the cleaning instructions of your LED manufacturer - this is important as cleaning shall under no circumstances damage LEDs or other electronics components on the PCB.

Further note that optical components shall not be cleaned with any chemicals - only micro fiber cloth may be used to remove fingerprints or other traces from handling.

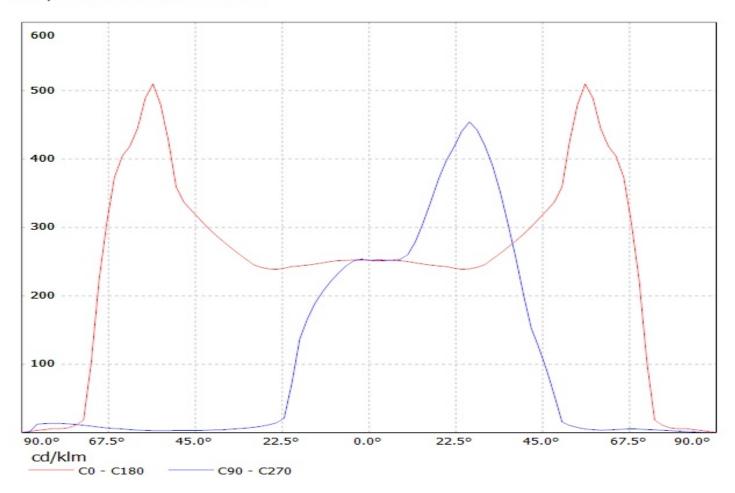

NOTE 1: We advise customer to ensure the suitability and sufficiency of the bond in the end product. For example, mechanical stress, vibration and holes on the surface of the circuit boar weaken the strength of the glue.
