**Popular Metal Pushbutton Switch Adds
Color Housing Option**

New feature makes further customization possible

Santa Rosa, California, September 29, 2010 – Schurter proudly announces the addition of a color anodized aluminium housing to the popular line of metal pushbutton switches. The red and green housings can be used to distinguish the start/stop switching functions.

The robust vandal proof switch has an IK07 protection class for high impact and IP67 ingress protection against water and dust. Its low profile flat front construction guards against side impact. The actuator is made of durable stainless steel.

The standard versions of the new MSM color housing are offered in 19 and 22mm mounting diameters with electrical rating of 5A @ 250 VAC. Additionally, custom lettering, other mounting diameters, and colors are available. Versions with switching current and voltage of 100 mA @ 30 VDC, or 10A @ 250 VAC are also available. A version with IP67 rated microswitch provides seal protection from the back. Terminals are quick-connect. Assembly includes pre-wiring of the contact module, which is then snapped onto the actuator housing. Typical applications include controller panels for automated machinery, construction machinery, industrial and medical equipment.

More information on the new MSM Colored Housing can be found on Schurter's website www.schurterinc.com/new_msm. For sales and product information contact Cora Umlauf at 800 848-2600 or info@schurterinc.com.

About Schurter Inc.

The Schurter Group was founded in Switzerland in 1933. With its more than 75 years in business, Schurter continues to be a progressive innovator and manufacturer of [Fuses and Varistors](#), [Circuit Breakers](#), [Power Entry Modules & Connectors](#), [Input Systems](#), [EMC Products](#), as well as providing manufacturing services for the electronic and electrical industries worldwide. Schurter's product innovation focuses on safe supply of power and making the interface between human and machine easier. Schurter's market focus is in the area of IT / Telecom, Medical, Space and Renewable Energy. Schurter, Inc. Santa Rosa, California, is the exclusive North American sales and distribution office for the Schurter Group.
