

SUPER FLUX LED LIGHT PIPE ADAPTER

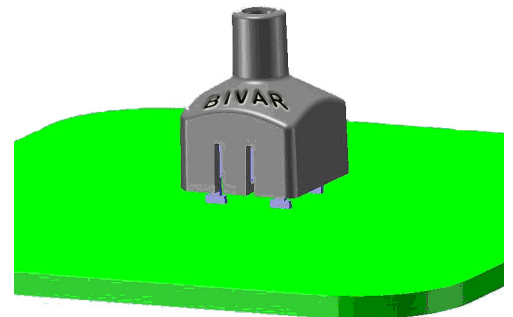

ORCA ADAPTER
ORFLP 1MM & 2MM SERIES

SUPER FLUX LED LIGHT PIPE ADAPTER (ORFLP 1MM & 2MM SERIES): Bivar's ORCA adapter is a physical device that connects an ORCA LED to a light pipe system to route light from a PCB to an area of indication. The new adapter supports Bivar's new ORCA super-flux LEDs and brings together ORCA LEDs with Bivar's current 1MM and new 2MM flexible light pipe system.

FEATURES

- Supports ORCA super-flux LEDs – single, bi-color and tri-color
- 7.6mm square package form factor
- Compatible with variety of Bivar flexible light pipe systems
- 30 degree viewing angles optimize light output
- Brings together ORCA LED series with Bivar's current 1mm and new 2mm flexible light pipesystems
- RoHS compliant

APPLICATIONS: ORCA LEDs are ideally suited for applications that require more visible indication, greater luminous intensity and higher power efficiency. ORCA LEDs offer a wide range of color choices which are typically required in the following applications:

- Automotive • LED Signs and Signals
- Decorative and Specialty Lighting • Outdoor Test & Measurement Equipment
