

Cordsets and Connectors for North America

Description

Experience has shown that the greatest benefit customers can receive from a cordset manufacturer is the fast delivery of quality products. Just as an extension cord or a power strip is often the last piece of the puzzle when putting up Christmas lights, purchasing cordsets is often an afterthought in the design cycle.

Therefore, we are proud to announce our new service model — Speedy TranSAction — which guarantees shipment from Phoenix Contact to our authorized distributor within five business days.

For those not familiar with the circular connectivity market, cordsets allow the water-tight interconnection of external electronic equipment or the internal wiring of electronic equipment or appliances. The ITC/PLTC rating that our new M12 product offers allows the cable assemblies to be used in cable trays/raceways in industrial establishments in accordance with the National Electrical Code (NEC) Articles 725/727.

Features and benefits

- High temp (105°C) yellow PVC cable
- AWM 2517, ITC/PLTC rated, sunlight-resistant
- UL Listed
- M12 SPEEDCON reduces assembly time up to 90 percent
- Over 250 new stocked PVC cordsets
- Over 150 new configurable order numbers (CMAT), which allow different cable materials and lengths to be ordered
- Local production of both catalog standard lengths or CMAT articles guarantee shipment within five business days
- M12 cordsets also available for Ethernet and DeviceNet
