Mouser Honored with Emerson Network Power Connectivity Solution's 2009 Top Distributor Award...Again

Mansfield, Texas, USA – May 18, 2010 – [Mouser Electronics](http://www.mouser.com), Inc., known for its rapid introduction of the newest products, today announced it has been awarded [Emerson Network Power](#) Connectivity Solution's 2009 Top Distributor Award. Emerson is a global leader in embedded telecommunications and data network infrastructures. Two of Emerson's major connector brands, Johnson and Aim-Cambridge, provide the product lines to Mouser and consist of RF audio/video connectors, cable assemblies, and adapters.

Doug G. Pennington, Emerson Network Power Connectivity Solutions Vice President of Sales, says, "In 2008, Mouser had a terrific year and leaped into our elite "Top 5 Distributor" club for the first time. If anyone had any thoughts that possibly they wouldn't repeat, well, Mouser is serving notice that it may be in the Top 5 to stay. Over the past several years, our distributors have delivered sales growth that has exceeded that of the market. Even in the challenging 2009 business environment, our distribution network again delivered better than market performance and Mouser was one of the reasons why. They stayed focused on what they do well and they delivered...again."

Barry McConnell, Mouser Senior Vice President of Products, is pleased to accept the award again, and stated, "Mouser's second capture of a top five distributor spot for Emerson is a confirmation of Mouser's commitment to quickly provide the newest products and best customer service for Emerson's popular and extensive lines of high quality devices. We look forward to another prosperous year with Emerson Network Power."

The Newest Products For The Newest Designs

Mouser/Emerson Award
Page Two

Known for its focus on design engineers with its broad product line, unsurpassed customer service, advanced on-line catalog and innovative product marketing, Mouser continuously offers customers the newest products and latest technologies for their new design projects.

Mouser Electronics' website with interactive online catalog is updated daily and searches over 5 million products to locate over a million part numbers available for easy online purchase. Plus, it houses downloadable data sheets, supplier-specific reference designs, application notes, technical design information and engineering tools.
