Mouser Electronics and Teridian Semiconductor Enter Global Distribution Agreement

Customer's Gain Instant Access to Power Meter, Networking, and Smart Card Reader ICs

Mansfield, Texas, USA –June 9, 2008 – [Mouser Electronics, Inc.](http://www.mouser.com), known for its rapid introduction of the newest products, today announced it has signed a global distribution agreement with [Teridian Semiconductor](http://www.teridian.com), a leading supplier of mixed-signal integrated circuits used in energy, automation, networking, and secure access systems.

"Teridian is excited about working with Mouser. We're confident that their focus on the design engineering community will accelerate the evaluation and adoption of Teridian's innovative solutions for industrial and consumer applications," said Pete Todd, Teridian Semiconductor's Vice President of Worldwide Sales.

According to Mike Scott, Mouser's Vice President of Active Products, the distributor is pleased to engage with Teridian Semiconductor Corp. to rapidly provide design engineers with new products and technologies.

"Teridian's unique semiconductor solutions provide our engineering customers the ability to design innovative systems in rapidly growing end applications like video over Ethernet, electronic identity, and power metering," Scott said. "The addition of Teridian Semiconductor continues our strategy to deliver our customers the industry's newest and most innovative products for their newest designs."

Mouser will stock a variety of Teridian products including power meter, Ethernet, modems, and smart card reader ICs. Teridian power meter system-on-chip devices offer the highest level of integration and flexibility and are ideal for developing smart meters for residential and industrial utility customers. Teridian's networking devices for Ethernet, modem, and wide area networking provide the industry's most compact and low bill of materials cost for consumer, industrial, and telecom applications which demand reliable connectivity. Teridian delivers turnkey smart card reader solutions for serial or

The Newest Products For The Newest Designs

USB applications, complete with pre-certified firmware for Windows and Linux operating systems, and offers a broad selection of smart card reader electrical interfaces.

Known for its broad-based product line, unsurpassed customer service, and streamlined warehouse operations, Mouser continuously offers customers the most innovative products and latest technologies for their new design projects.

Mouser Electronics is the only major distributor to publish a new 2,100+ page print catalog every 90 days. In addition, its website with interactive online catalog is updated daily, contains more than a million products for easy online purchase, provides over 1.5 million cross-references, as well as more than 831,000 downloadable data sheets, supplier-specific reference designs, application notes, and other technical design information.

About Mouser

Mouser Electronics, Inc. is an electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers. Mouser.com features more than a million products online from more than 366 manufacturers. Mouser's 2,100+ page catalog is published every 90 days, providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 280,000 customers in 170 countries from its 432,000 sq. ft. state-of-the-art facility in Mansfield, Texas. For more information, visit www.mouser.com.

About Teridian Semiconductor Corp.

Teridian Semiconductor designs, sells and provides engineering support for its mixed-signal integrated circuits used in energy, automation, networking, and secure access systems. These ICs connect our customers' digital systems to the analog inputs of our world found in utility metering, industrial automation, set top box, digital TV, voice over IP, electronic identity and point of sale applications.

Teridian Semiconductor is Simplifying System integration™ for its customers with a focus on accelerating system development, and reducing the engineering time required to achieve production. For more information, visit <http://www.teridian.com>.
