

For Immediate Release

Mouser First To Stock the New 3M 8F36 Series MiniSAS Cable Assemblies

Mansfield, Texas, USA — March 15, 2011 - Mouser Electronics, Inc., regarded as a top global engineering design resource for semiconductors and electronic components, today announced it is stocking new product from 3M.

3M's 8F36 Series High Routability Internal Mini Serial Attached SCSI (MiniSAS) Cable Assemblies are the ideal choice for space constrained systems due to their exceptional foldability with minimal loss and performance impact. These unjacketed, extremely thin, and very flexible assemblies utilize 3M's new ultra low-profile, high-speed, high-signal density 3M™ SL8800 Series Twin Axial Cable that provides excellent transmission properties allowing signals to travel a longer distance. In addition, the excellent performance of 3M's SL8800 Series Twin Axial Cable used in the construction of the 8F36 Series stretches the user's loss budget, allowing him to use extra length to route the cable through a more convenient location, out of the way of airflow, or around difficult obstructions. Even if folded multiple times, 3M's unique High Routability Internal Mini Serial Attached SCSI (MiniSAS) Cable Assemblies meet SAS 2.1 performance requirements. With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in emerging technologies. Mouser offers customers the latest, most technologically advanced components for their newest design projects. Mouser Electronics' website is updated daily and searches nearly 7 million products to locate over 1.8 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 1.8 million products online from more than 400 manufacturers. Mouser publishes multiple catalogues per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 300,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit www.mouser.com.

About 3M

3M is a leading supplier of innovative solutions for the electrical, electronics, and communications industries. A diversified technology company, 3M has a worldwide presence in several markets, including OEM (electrical and electronics), consumer electronics, telecommunications, computers, and peripherals, as well as the aerospace, military, automotive, and medical markets.
