Actel Fusion® Embedded Development Kit

Mansfield, Texas, USA — November 02, 2009 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Actel.

The Actel Fusion Embedded Development Kit is a complete solution that lets designers quickly evaluate the Actel Fusion® mixed-signal FPGA family and prototype their design. The fully RoHS-compliant Actel Fusion Embedded Development Kit contains a credit card-sized modular board featuring the powerful ARM® Cortex™-M1-enabled Fusion M1AFS1500 device in the FGG484 package as well as a miniature programming stick. The Fusion Embedded Development Kit quickly demonstrates that a single-chip solution for complex embedded systems can monitor analog signals, manage power, and monitor temperature. This can all be done from the Fusion FPGA, which only needs a single 3.3V supply.

Mouser Electronics is the only major distributor to publish a new 2,184+ page print catalog every 90 days. In addition, its website with interactive online catalog is updated daily, contains more than a million products for easy online purchase, provides over 1.5 million cross-references, as well as more than 900,000 downloadable data sheets, supplier-specific reference designs, application notes, and other technical design information.

About Mouser

Mouser Electronics, Inc. is an electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers. Mouser.com features more than a million products online from more than 390 manufacturers. Mouser's 2,184+ page catalog is published every 90 days, providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 280,000 customers in 170 countries from its 432,000 sq. ft. state-of-the-art facility in Mansfield, Texas. For more information, visit www.mouser.com.

About Actel

Actel Corporation is the leading supplier of nonvolatile, [low-power FPGAs](#), [mixed-signal FPGAs](#), and programmable logic solutions. Actel's mission is to manage power consumption at both the chip and system levels, leveraging the industry's lowest power FPGAs and unique mixed-signal FPGAs, to offer system designers a competitive edge.

Actel 's history of reliability, couple with its unique flash -based technology, sets it apart from traditional FPGA manufacturers. Whether you're designing applications for consumer and portable medical markets, tomorrow's environmentally friendly data centers, industrial controls, or the automotive, space and military/aerospace markets, power matters.
