Amulet Technologies Graphical OS Chip™ for Color Displays

Mansfield, Texas, USA — July 07, 2009 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Amulet Technologies.

The Amulet Technologies Graphical OS Chip™ for Color Displays takes designs to the next level by implementing interactive color-rich GUIs designed in dynamic HTML. The Amulet Technologies Graphical OS Chip for Color Displays includes all of the hardware and software required to turn a color LCD and touch panel into a user interface. This Amulet Technologies color GUI processor features an integrated LCD controller that supports passive and active displays up to 24 bits per pixel as well as USB 2.0, TWI, UART, and SPI interfaces. It also includes a Power Management Controller for low power operation. The Graphical OS Chip for Color Displays is ideal for a wide range of embedded system applications, including appliances, consumer electronics, industrial controls, medical equipment, and office automation.

About Amulet Technologies

Amulet Technologies is a semiconductor company specializing in chips and royalty free software that drive Liquid Crystal Displays (LCDs). For nearly a decade, Amulet's patented display technology, the Graphical Operating System in Silicon™, has enabled OEM's to cost effectively improve the user experience of their electronic devices with visually appealing, interactive user interfaces that provide 24/7 reliability. Amulet works with 8-bit host microcontrollers, uses serial interfaces (RS232), allows collaborative GUI content development, and uses legacy hardware and software.

Amulet Technologies offers display solutions, including LCD controller chips, fully integrated modules, and controller boards. With the Amulet controller chip supporting the majority of the monochrome displays on the market, customers purchasing the display separately from the Amulet Graphical OS Chip™ are able to integrate the two with ease. Display Starter Kits are available to assist customers in the review and prototype phases.
