Mouser is now stocking the BeagleBoard-xM Development Board.

Mansfield, Texas, USA — March 07, 2011 - Mouser Electronics, Inc., regarded as a top global engineering design resource for semiconductors and electronic components, today announced it is stocking new product from BeagleBoard.

The BeagleBoard-xM delivers extra ARM® Cortex™-A8 MHz and extra memory with 512MB of low-power DDR RAM, enabling engineers, innovators, and hobbyists to take their imagination to another level. The BeagleBoard-xM features an open hardware design that improves upon the laptop-like performance and expandability of the original BeagleBoard while keeping at hand-held power levels. Direct connectivity is supported by the on-board four-port hub with 10/100 Ethernet while maintaining a tiny 3.25" x 3.25" footprint. The BeagleBoard-xM is intended as a community-supported platform that can be used as the basis for building more complete development systems and as a target for community software baselines. With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in emerging technologies. Mouser offers customers the latest, most technologically advanced components for their newest design projects. Mouser Electronics' website is updated daily and searches nearly 7 million products to locate over 1.8 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 1.8 million products online from more than 400 manufacturers. Mouser publishes multiple catalogues per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 300,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit www.mouser.com.

About BeagleBoard

BeagleBoard.org develops low-cost, fan-less single-board computers based on low-power Texas Instruments processors featuring the ARM Cortex-A8 core with all of the expandability of today's desktop machines, but without the bulk, expense, or noise. BeagleBoard.org provides an open source development platform for the creation of high-performance embedded designs. For more information, visit <http://beagleboard.org/>.
