Switched Inlet Filters by Tyco Electronics / Corcom just got even smaller!

Mansfield, Texas, USA — January 22, 2010 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Corcom / Tyco Electronics.

Tyco Electronics / Corcom CU Series Power Entry Modules fill the need for smaller versions of the C series switched inlet filters. The CU series provides power entry for equipment designed for popular 1U (1 3/4") height equipment racks. The filtered version provides complete shielding, shrouded quick connect terminals, and basic filtering applications requiring 1A - 15A current carry capabilities. The filtered versions also offer a new rear mount style for enhanced EMI shielding and a flush appearance. The Tyco Electronics / Corcom CU Power Entry Modules feature a modular design and are available in snap-in and flanged mounting options. The unfiltered version has the option of 3 different snap-in configurations making it possible to use a variety of different panel cut-outs. To learn more, visit

About Corcom / Tyco Electronics

Tyco Electronics / Corcom is the world leader in RFI technology. Since 1955, Corcom has been providing solutions to leading telecommunications, computer, industrial and medical companies worldwide through their wide range of power line filters, power entry modules, and filtered modular jacks (RJ11-RJ45), which are specifically designed to help bring equipment into FCC and international emissions standards. Corcom's product line includes telecom and Ethernet connectors, EMI / RFI suppressors and ferrites, feed-thru capacitors, frequency control filters, as well as power line filters. All Corcom RFI filters have been designed and tested for susceptibility and/or emissions applications, and have received approval from major safety agencies throughout the world, including UL, CSA and VDE.
