Mouser Electronics Honored with Emerson Network Power Connectivity Solution's 2008 Top Distributor Award

Mouser reaches milestone with coveted award

Mansfield, Texas, USA – April 21, 2009 – [Mouser Electronics](http://www.mouser.com), Inc., known for its rapid introduction of the newest products, today announced it has been awarded [Emerson Network Power](#) Connectivity Solution's 2008 Top Distributor Award. Emerson is a global leader in embedded telecommunications and data network infrastructures. Some of Emerson's major brands, Johnson, and Aim-Cambridge, provide the product lines to Mouser and consist of RF and audio/video connectors and cable assemblies, and adapters.

Douglas G. Pennington, Emerson Network Power Connectivity Solutions Vice President of Sales, says, "Emerson Connectivity Solutions is fortunate to have, what we think, is one of the best distribution networks in the industry. This is proven by the fact that, over the past several years, our distributors have delivered sales growth that has exceeded that of the market. Given this context, it says a lot about the job that Mouser Electronics has done when one considers that, within this elite group of distributors, Mouser has stood out as one of the fastest growing of them all. The thing that impresses us most about them is their focused and professional approach to identifying what their customers need and then delivering it. Their model is rock solid and, because of this, we are certain that Mouser will continue to grow into the future as one of our top distributors."

The prestigious Emerson award is given annually and this was Mouser's first venture into the top five distributor spot. Barry McConnell, Mouser Senior Vice President of Products, reflects on what the award means to Mouser, "Emerson's popular and extensive product line of high quality devices, combined with Mouser's successful commitment to quickly provide the newest products and best service, was undoubtedly the reason for Mouser's two percent market share increase. This award from Emerson is a confirmation of our working relationship and a beacon for the future."
