

For Immediate Release

Get Unmatched Performance & Ultra-Low Power Consumption With Energy Micro EFM32TG Tiny Gecko 32-Bit MCUs!

August 10, 2011 - Mouser Electronics, Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced it is stocking new product from Energy Micro.

Energy Micro EFM32TG Tiny Gecko 32-bit microcontrollers (MCUs) provide a combination of unmatched performance and ultra-low power consumption in active and sleep modes. Energy Micro EFM32TG MCUs consume as little as 160 μ A/MHz in run mode and as little as 900nA with a Real Time Counter running, Brown-out, and full RAM and register retention. The low energy consumption of Tiny Gecko devices outperforms any other 8-, 16-, or 32-bit solution. The EFM32TG family includes autonomous and energy efficient peripherals, high overall chip and analog integration, and a 32-bit ARM Cortex-M3 processor. These Energy Micro MCUs are ideal for demanding 8-, 16-, and 32-bit energy-sensitive applications, including gas metering, energy metering, water metering, and smart metering.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 17 global support locations and the latest, most technologically advanced components for their newest design projects. Mouser Electronics' website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 2 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 300,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit www.mouser.com.

About Energy Micro

Energy Micro is focused on developing the world's most energy friendly microcontrollers (MCUs) based on modern and powerful microprocessor architectures. Energy Micro designs its products to be technically superior with an ultra-efficient and easy-to-use design environment that will reduce their development cost and time-to-market. For more information, visit <http://www.energymicro.com>.
