## **FCI launches DDR3 Memory Module Sockets**

**Mansfield, Texas, USA — January 19, 2010** - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from FCI.

The FCI DDR3 Memory Module Sockets are designed to accept 240-position DDR3 memory modules as per JEDEC MO-269. FCI's DDR3 memory sockets are available in low-contact resistance versions that support the use of RDIMM. The very low profile (VLP) form factor option provides an overall connector height of less than 20.6mm and complies to the JEDEC SO-007 specifications. The FCI DDR3 Memory Module Sockets allow convenient memory expansion in servers, workstations, desktop PCs, mobile PCs, and embedded applications in communications and industrial equipment. <http://www.mouser.com/fci>.

Known for its broad-based product line, unsurpassed customer service, and streamlined warehouse operations, Mouser continuously offers customers the most innovative products and latest technologies for their new design projects. Mouser Electronics' website with interactive online catalog is updated daily, and searches over 5 million products to locate over a million part numbers available for easy online purchase. Plus, downloadable data sheets, supplier-specific reference designs, application notes, technical design information and engineering tools.

### **About Mouser**

Mouser Electronics, Inc. is an electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers. Mouser.com features more than a million products online from more than 400 manufacturers. Mouser publishes multiple catalogs a year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 270,000 customers in 170 countries from its 432,000 sq. ft. state-of-the-art facility in Mansfield, Texas. For more information, visit [www.mouser.com](http://www.mouser.com).
