For Immediate Release

FTDI X-Chip Series Interface ICs & Modules are available at Mouser!

March 16, 2012 - Mouser Electronics, Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced it is stocking new product from FTDI.

FTDI's X-Chip Series Interface ICs & Modules target a wide range of interfaces, including basic and full UART, FIFO, I^{2}C, SPI and FTDI's FT12485, allowing engineers to easily incorporate USB connectivity into their systems. X-Chip Series Interface ICs are USB 2.0 full speed chips which join the USB 2.0 high-speed, H Series of devices and the popular R Series of integrated circuits already in production today. Besides offering an expanded, world class feature set, these FTDI X-Chip Series Interface ICs offer reduced pin counts. Whether the engineer needs a leaded, SSOP package or a leadless QFN package, pin-outs have been minimized and range from a 10 pin DFN package for the FT200XD I^{2}C solution to 24 pins for a FIFO to USB bridge. X-Chip Series Modules help engineers integrate FTDI's X-Chip Series Interface ICs into new and existing designs.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and the latest, most technologically advanced components for their newest design projects. Mouser Electronics' website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 2 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 300,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit www.mouser.com.

About FTDI

FTDI specializes in converting legacy peripherals to Universal Serial Bus (USB). They offer the easiest route to USB migration by combining USB-Serial (USB-RS232) and USB-FIFO silicon solutions with their ready-to-go royalty free USB drivers. FTDI´s "total" solutions offer reduced development and debug costs and a fast time to market. For more information, visit http://www.ftdichip.com.
