Harwin Datamate Trio-Tek 101Lok in Stock at Mouser Electronics

High reliability 2mm contacts shorten and simplify assembly

Mansfield, Texas, USA – June 22, 2009 – [Mouser Electronics](http://www.mouser.com), Inc., known for its rapid introduction of the newest products, today announced they are stocking Harwin's Datamate Trio-Tek 101Lok series, a fast-mate version of its secure, 2mm-pitch, J-Tek Datamate cable-to-cable, cable-to-board, and board-to-board connector family. [Harwin](http://www.harwin.com) is a highly respected, global designer and manufacturer of specialty interconnects for over 50 years.

Historically, secure mating has been achieved using jack screws. The new 101Lok achieves secure mating with a simple quarter-turn (101 degrees) with no special tooling. 101Lok connectors use specially designed-hardware tensioned by a coil spring to reduce the time required to mate the connector halves. This is ideal for those users that are seeking a faster means of assembly, while ensuring complete security of the retention device. This spring tensioning also helps resist vibration in rugged environment applications such as aerospace. This novel locking feature is also ideally suited to Harwin's mixed technology Mix-Tek Datamate connectors and also the Trio-Tek range where high production volumes demand minimal assembly costs. For more information, about Harwin's Datamate Trio-Tek 101Lok series, visit <http://www.mouser.com/HarwinTrioTek>.

Known for its broad-based product line, unsurpassed customer service, and streamlined warehouse operations, Mouser continuously offers customers the most innovative products and latest technologies for their new design projects.

The Newest Products For The Newest Designs

Mouser Electronics is the only global distributor to publish a new page print catalog every 90 days. In addition, its website with interactive online catalog is updated daily, and searches over 5 million products to locate over a million part numbers available for easy online purchase. Plus, downloadable data sheets, supplier-specific reference designs, application notes, technical design information and engineering tools.

About Mouser

Mouser Electronics, Inc. is an electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers. Mouser.com features more than a million products online from more than 390 manufacturers. Mouser's 2,184+ page catalog is published every 90 days, providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 270,000 customers in 170 countries from its 432,000 sq. ft. state-of-the-art facility in Mansfield, Texas. For more information, visit <http://www.mouser.com>.

About Harwin

Harwin has supplied superior electrical interconnects for over 50 years. Harwin's global network of manufacturing, support centers, and distributors allow them to meet the specialist needs of the world interconnection market. Harwin connectors have a proven history in several applications, including Military and Aerospace. For more information, visit <http://www.harwin.com>.
