Molex EXTreme MicroPower™ High-Current Header

Mansfield, Texas, USA — July 23, 2009 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Molex.

The low-profile Molex EXTreme MicroPower™ High-Current Headers are designed for high-current density applications and are soldered directly to PCBs such as a Voltage Regulator Module (VRM) or a mother-board using a slotted via. With a current rating of 16.0A per blade at 30° T-rise, Micro-Max Power may be used in any board-to-board application where power transfer is needed through a non-separate interface in a compact design. The Molex EXTreme MicroPower High-Current Headers are available in circuit sizes from 4 to 24 blades in a single-row configuration.

About Molex

Established in 1938, Molex is one of the world's largest global manufacturers of interconnect products. Molex creates innovative product solutions for wire-to-wire, wire-to-board, and board-to-board interconnect, including header, backplane, terminal, telecom, ethernet, and cable, as well as application tooling. Molex's efforts to minimize the environmental impacts of business activities, products, and services are reflected in their commitment to their environment management system, ECO CARE.

Nearly Every Connector Under the Sun

In an industry with overwhelming options, it is comforting to know that you can find what you need from Molex and get it when you need it from Mouser. For more information, visit <http://www.molex.com>.
