Molex DuraClik™ Wire-to-Board Connectors

Mansfield, Texas, USA — August 24, 2009 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Molex.

Molex introduces the DuraClik™ 2.0mm (.079") Pitch Wire-to-Board Connectors that are designed for on-board instrumentation applications such as steering wheels that do not require any extra terminal retainers. The single row, right-angle SMT, positive lock connectors feature an audible and tactile click to confirm mating, as well as polarization features to prevent mis-mating. The secure inner-lock system ensures complete connector locking, prevents lock breakage during handling, and provides space savings over outer-locking systems. For high vibration applications, the Molex DuraClik Wire-to-Board Connectors offer wide, long fitting solder nails that have been tested to withstand 100N (10kgf) of upward pull force.

About Molex

Established in 1938, Molex is one of the world's largest global manufacturers of interconnect products. Molex creates innovative product solutions for wire-to-wire, wire-to-board, and board-to-board interconnect, including header, backplane, terminal, telecom, ethernet, and cable, as well as application tooling. Molex's efforts to minimize the environmental impacts of business activities, products, and services are reflected in their commitment to their environment management system, ECO CARE.

Nearly Every Connector Under the Sun

In an industry with overwhelming options, it is comforting to know that you can find what you need from Molex and get it when you need it from Mouser. For more information, visit <http://www.molex.com>.
