For Immediate Release

Mouser Electronics Receives AS9120A Certification for its High-Level Traceability and Anti-Counterfeit Controls

August 1, 2011 – [Mouser Electronics](http://www.mouser.com), Inc., a top design engineering resource and global authorized distributor for semiconductors and electronic components, today announced that it has completed the rigorous audits to be registered as an AS9120A Distributor. AS9120A is a quality management certification for distributors of aerospace commodity items. This high standard addresses chain of custody, traceability, control and availability of records. Mouser will carry dual registration to AS9120A and ISO 9001:2008 to serve both aerospace customers and customers wishing to purchase commercial products.

Based on ISO 9001, with nearly 100 additional requirements specific to aerospace distributors, AS9120A provides companies with a comprehensive quality system focused on areas directly impacting product safety and reliability. With this certification, Mouser reaps quality and efficiency benefits such as identifying opportunities for operational improvements and cost reduction, improved audit and surveillance efficiency, reduced number of customer audits required and streamlined documentation.

“AS9120A is a perfect fit to Mouser’s enhanced traceability and anti-counterfeit efforts,” explains Pete Shopp, Mouser Senior Vice President of Business Operations. “We wanted a standard that would be recognized by our customers as Mouser’s commitment to combating the serious problem of counterfeits. In addition to AS9120A, Mouser has also incorporated key provisions of AS5553 Counterfeit Electronic Parts: Avoidance, Detection, Mitigation, and Disposition into the Quality Management System. Mouser continues to provide customers with authorized genuine, commercial off-the-shelf components, supplies and equipment. Counterfeit components are of growing concern in our industry. Customers and suppliers can trust that Mouser is distributing genuine components.”

Mouser’s state-of-the-art wireless warehouse management system is streamlined to nearly perfect pick-and-ship operations. The 3,400 sq. ft. data center features a pre-action fire suppression system, connections to multiple power sources, and a dedicated fiber communications ring to ensure uninterrupted Internet operations – a core component of Mouser’s global sales operations.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 17 global support locations and the latest, most technologically advanced components for their newest design projects. Mouser Electronics' website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 2 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 300,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas.
