Jumpstart your LCD display design! The New NHDev LCD Development Board from Newhaven Display is in stock at Mouser!

Mansfield, Texas, USA — October 13, 2010 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Newhaven Display.

The Newhaven Display NHDev LCD Development Board is the ideal tool for prototyping and evaluating Newhaven Display's COG, TFT, character and graphic LCD displays. This STM32F based LCD development board comes pre-programmed to demonstrate each display with preloaded images and text files from the included SD card. These files can also be easily edited or replaced with user created images allowing you to see what your actual application will look like. The Newhaven Display NHDev LCD Development Board features easy-to-use functionality that allows for quick time to market while keeping your development costs low. The design of the board has selection features making it easy for the user to plug in any Newhaven display and with a push of a button have it up and running in minutes versus days. The NHDev Board now gives you the freedom to pick and choose several Newhaven displays instead of just one when prototyping your product.
