Mouser has Stock on the New Stellaris® LM3S9B92 EVALBOT Robotic Evaluation Board by Texas Instruments!

Mansfield, Texas, USA — September 29, 2010 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Texas Instruments | Microcontrollers.

The Texas Instruments Stellaris® LM3S9B92 EVALBOT Robotic Evaluation Board is a robotic evaluation platform for the Stellaris LM3S9B92 microcontroller. The EVALBOT is a small robotic device that features a board with a Stellaris LM3S9B92 Cortex-M3 MCU, 10/100 Ethernet, connector, USB OTG (On-The-Go), and I²S. The TI EVALBOT Kit contains wheels that are easy to attach to the board, a display, batteries, a USB cable, and a CD with the IAR tools, the StellarisWare software, and all the documentation required. Software examples provided with the EVALBOT demonstrate how to initialize µC/OS-III Real-Time Kernel and create simple tasks, how to use the µC/Probe to monitor and change application variables, as well as basic motion control functions using the robot. The uC/OS-III Book provides examples for the reader using the TI EVALBOT. To learn more, visit <http://www.mouser.com/tievalbot>.

Known for its focus on design engineers with its broad product line, unsurpassed customer service, advanced on-line catalog and innovative product marketing, Mouser continuously offers customers the newest products and latest technologies for their new design projects.

Mouser Electronics' website with interactive online catalog is updated daily and searches over 5 million products to locate over a million part numbers available for easy online purchase. Plus, it houses downloadable data sheets, supplier-specific reference designs, application notes, technical design information and engineering tools.

About Mouser

Mouser Electronics, Inc. is an electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers. Mouser.com features more than a million products online from more than 400 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 270,000 customers in 170 countries from its 432,000 sq. ft. state-of-the-art facility in Mansfield, Texas. For more information, visit www.mouser.com.

About Texas Instruments | Microcontrollers

Texas Instruments (TI) offers designers the broadest range of embedded control solutions from ultra-low-power MSP430 and 32-bit general purpose TMS470 ARM7™ family-based MCUs, to high-performance TMS320C2000™ digital signal controllers. For more information, visit
