

For Immediate Release

Texas Instruments Stellaris® USB+CAN Evaluation Kits for LM4F232 ARM Cortex™-M4F-based MCU are at Mouser!

December 28, 2011 - [Mouser Electronics, Inc.](http://www.mouser.com), regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced it is stocking new product from Texas Instruments | Microcontrollers.

Texas Instruments Stellaris® LM4F232 USB+CAN Evaluation Kits are a compact and versatile evaluation platform for the Stellaris LM4F232 ARM Cortex™-M4F-based microcontroller. The evaluation kit design highlights the TI LM4F232 MCU's integrated USB 2.0 On-the-Go/Host/Device interface, CAN, analog, and low-power capabilities. The TI LM4F232 USB+CAN Evaluation Kits feature a Stellaris M4F MCU in a 144-LQFP package, a color OLED display, ISB OTG connector, a microSD card slot, a coin cell battery for use with the Stellaris low-power Hibernate mode, a temperature sensor, a three-axis accelerometer for motion detection, and easy access through holes to all of the available device signals. These TI evaluation kits also include extensive source code examples, allowing you to start building C code applications quickly.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and the latest, most technologically advanced components for their newest design projects. Mouser Electronics' website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 2 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 300,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit www.mouser.com.

About Texas Instruments | Microcontrollers

Texas Instruments (TI) offers designers the broadest range of embedded control solutions from ultra-low-power MSP430 and 32-bit ARM® Cortex-M3™-based Stellaris® microcontrollers and Cortex R4F safety critical MCUs to 32-bit real time TMS320C2000™ MCUs.

Trademarks
