Smallest chip-scale Power MOSFETs on the market!

Mansfield, Texas, USA — December 07, 2009 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Vishay Siliconix.

Vishay Siliconix 20-V p-channel Si8461DB and Si8465DB MICRO FOOT® power MOSFETs are the smallest chip-scale power MOSFETs on the market (1-mm by 1-mm by 0.548-mm). These Vishay Siliconix MICRO FOOT power MOSFETs can be used for load switch, battery switch, and charger switch applications in a wide range of portable devices. The small size and height of the Si8461DB and Si8465DB reduce the space occupied by power management circuitry and enable more functionality. These Vishay Siliconix MICRO FOOT power MOSFETs have a 9% smaller footprint than the next smallest chip-scale power MOSFET on the market.
