Mouser Electronics and Blackhawk Sign Global Distribution Agreement

Mouser now stocking emulation tools for Texas Instruments' DSPs

Mansfield, Texas, USA – April 14, 2009 – [Mouser Electronics](http://www.mouser.com), Inc., known for its rapid introduction of the newest products, today announced it has signed a global distribution agreement with [Blackhawk](http://www.blackhawk.com), a high-technology company that specializes in advanced JTAG emulators, DSP development tools and software.

Mouser's offering of Blackhawk products includes emulators from the XDS510- class models (USB510L JTAG Emulator, USB2000 Controller), XDS560- class models (PCI560, USB560 JTAG), and XDS560 Trace System. In addition to the emulators, Mouser will also be stocking Blackhawk adapters to fit with standard Texas Instruments JTAG target headers.

Mike Scott, Mouser Vice President of Active Products, stated, "Blackhawk's emulation tools support all of the advanced capabilities of Texas Instrument's latest DSPs. Adding Blackhawk to our linecard gives our engineering customers access to more development tools to help them get their designs to market quicker."

"Blackhawk is very pleased to have Mouser distribute our development tools," said Andrew Ferrari, Director of Operations for the New Jersey based company. "Mouser's reach into 170 countries and huge customer base brings our products closer to our audience, the design engineer. As an engineer myself, I can appreciate first hand how Mouser is my best source when a new project starts," added Ferrari.

Known for its broad-based product line, unsurpassed customer service, and streamlined warehouse operations, Mouser continuously offers customers the most innovative products and latest technologies for their new design projects.
