Mouser Electronics Stocking Texas Instruments' Solar Energy Harvesting Development Tool

Mansfield, Texas, USA — March 11, 2009 - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Texas Instruments | Microcontrollers.

The Texas Instruments eZ430-RF2500-SEH Solar Energy Harvesting Development Tool helps designers create a perpetually powered wireless sensor network based on the ultra-low-power MSP430™ microcontroller (MCU). The eZ430-RF2500-SEH Solar Energy Harvesting kit includes a module with a high efficiency solar panel optimized for operating indoors under low-intensity fluorescent lights that provide enough power to run a wireless sensor application with no additional batteries. This TI development kit also has inputs for external energy harvesters and stores additional energy in a pair of thin-film rechargeable EnerChips. The eZ430-RF2500 is used to run the energy harvesting application and is a complete USB-based MSP430 wireless development tool. The TI kit includes a debugging interface that allows for real-time, in-system debugging and programming for the MSP430 and is also the interface to transfer data to a PC from a wireless system.

Mouser Electronics is the only major distributor to publish a new 2,184+ page print catalog every 90 days. In addition, its website with interactive online catalog is updated daily, contains more than a million products for easy online purchase, provides over 1.5 million cross-references, as well as more than 900,000 downloadable data sheets, supplier-specific reference designs, application notes, and other technical design information.

About Mouser

Mouser Electronics, Inc. is an electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers. Mouser.com features more than a million products online from more than 390 manufacturers. Mouser's 2,184+ page catalog is published every 90 days, providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 280,000 customers in 170 countries from its 432,000 sq. ft. state-of-the-art facility in Mansfield, Texas. For more information, visit www.mouser.com.

About Texas Instruments | Microcontrollers

Texas Instruments (TI) offers designers the broadest range of embedded control solutions from ultra-low-power MSP430 and 32-bit general purpose TMS470 ARM7™ family-based MCUs, to high-performance TMS320C2000™ digital signal controllers. For more information, visit
