Mouser Offers the Latest in Sensor Technologies from Honeywell

October 13, 2011 – Mouser Electronics, Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced it is stocking the latest Honeywell Sensing & Control sensors for humidity, temperature, and ultra-low pressure.

The Honeywell HumidIcon™ is a combined humidity and temperature sensor in one device with industry-leading Total Error Band, long term stability, and reliability while offering the lowest total system cost compared to other solutions. True, temperature-compensated digital I^2C output allows the removal of the components associated with signal conditioning from the PCB to free up space and reduce costs associated with those components. Applications include HVAC/R systems, sleep apnea machines and ventilators, incubators/microenvironments, air compressors, and telecom cabinets. To learn more, visit http://www.mouser.com/HoneywellHumidicon/.

In addition, Honeywell introduces the Honeywell NSC Series TruStability® Pressure Sensors that offer infinite resolution on the pressure signal and are both uncompensated and unamplified. These board mount sensors offer the flexibility of custom algorithms for self-calibration plus industry-leading stability, accuracy, and repeatability. With a liquid media option on one port, the Honeywell NSC Series TruStability Pressure Sensors provide both monitoring and control of pneumatic flow and system pressure for precise and efficient performance in industrial and medical applications. To learn more, visit http://www.mouser.com/HoneywellNSC/.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 2 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 325,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit http://www.mouser.com.

About Honeywell Sensing & Control

For innovation that's set well apart, there is only Honeywell Sensing and Control. With more than 50,000 products ranging from snap action, limit, toggle, and pushbutton switches to sensors for position, speed, pressure, torque, temperature, humidity, and airflow. Honeywell Sensing and Control has a product to meet your needs. Honeywell Sensing and Control brings engineering expertise and capabilities that no other company offers. With its comprehensive portfolio, quality, and reliability, Honeywell Sensing and Control products support every step of your most demanding goals and standards to deliver consistent, trustworthy performance.

Trademarks
