Mouser Delivering Redpine Signals Technologies
to Design Engineers Worldwide

November 14, 2012 – Mouser Electronics, Inc. today announced its new global partnership with Redpine Signals, a wireless systems company offering unique chipset and system level products for wireless networks.

Since 2001, Redpine has been developing fundamental technologies to enable efficient wireless communications for future RF environments and usage scenarios. Redpine has focused on innovation through research in areas that include OFDM/OFDMA, MIMO, energy efficient wireless, low power CMOS RF, and high efficiency CMOS PAs.

Mouser's stock of Redpine's products includes single and dual-band ultra-low power, high-performance WLAN modules for applications such as VoWiFi phones and media players, as well as fully self-contained Wi-Fi modules for enterprise M2M applications.

"We are very pleased to welcome Redpine Signals to our line-up of industry-leading wireless and embedded suppliers," says Russell Rasor, Mouser Vice President of Advanced Technology. "Redpine and Mouser make excellent strategic partners, as we pursue the most advanced wireless technologies and cutting edge components for our customers. We look forward to a long, successful partnership."

"Mouser has decades of experience as a trusted, authorized distributor with a solid focus on the needs of design engineers and buyers in the design stage, which makes them a perfect fit for our company," says Venkat Mattela, CEO of Redpine Signals. "With Mouser's dedication to superior quality and customer service, we're confident this partnership will bring a great advantage to both of our companies."

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 10 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

The Newest Products For Your Newest Designs®

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit http://www.mouser.com.

About Redpine Signals

Headquartered in San Jose, California, Redpine Signals, Inc., is a fabless semiconductor and wireless system solutions company focusing on innovative, ultra-low-power and high-performance products for next-generation wireless applications. Redpine was founded in 2001 and was the first in the industry to launch an ultra low power and low-cost single-stream 802.11n chipset in late 2007. Again, in 2009 Redpine pioneered the adoption of self-contained 802.11n modules into the then emerging M2M market. Redpine offers chipsets, modules and solutions covering multiple market segments including industrial, consumer electronics, medical, mobile, PC, and smart energy. Its technology portfolio includes multi-stream 802.11n, 802.11ac, BT4.0 and mobile WiMax (802.16e). The company has more than 150 employees worldwide. For more information on Redpine products, visit http://www.redpinesignals.com/.
