For Immediate Release

Mouser Delivers Blackhawk's New USB510W Wireless JTAG Emulator

July 6, 2012 – Mouser Electronics, Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced it is stocking new emulators from Blackhawk.

The Blackhawk USB510W Wireless JTAG Emulator is the first-of-its-kind wireless JTAG emulator for Texas Instruments DSPs. It uses an embedded 802.11 wireless transceiver and requires no hard connection to a PC in order to debug using Code Composer Studio™. The major benefit of this capability is to completely isolate the PC from the target, therefore eliminating the chance for high-voltage damage of test components. This protects the target board, PC, and emulator from voltage spikes and the absence of a common ground plane. Configuration of the USB510W is accomplished via the USB port in the same fashion as setting up a wireless router. Alternatively, the USB510W can be used wirelessly right out of the box using the default settings, suitable for most WiFi networks. The USB510W can also be used for debugging via the high-speed USB port. To learn more, visit http://www.mouser.com/blackhawk-USB510W/.

Also available is the new Blackhawk USB560v2 System Trace Emulator, based on the XDS560v2 system trace reference design from Texas Instruments. The XDS560v2 is the next-generation of the high-performance XDS560-class technology. The compact USB560v2 includes a bus-powered, high-speed USB 2.0 host interface. With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 8.9 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit http://www.mouser.com.

About Blackhawk

Blackhawk is a leader in the design of DSP hardware and software development tools. Blackhawk was the first company to provide a USB JTAG Emulator for Texas Instruments DSPs and is a member of the Texas Instruments Third Party Developers Network.
