

For Immediate Release

Mouser Electronics Stocks NBP Series Honeywell Pressure Sensors

July 24, 2012 – [Mouser Electronics, Inc.](http://www.mouser.com), regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced it is stocking new sensors from [Honeywell Sensing and Control](http://www.honeywell.com).

Honeywell NBP Series Board Mount Pressure Sensors are uncompensated, unamplified sensors that measure absolute and gage pressures in medical and industrial applications. The absolute versions feature an internal vacuum reference and an output value proportional to absolute pressure. Gage versions are referenced to atmospheric pressure and provide an output proportional to pressure variations from atmosphere. This cost-effective series offers basic performance and is ideal for customers who want to do their own compensation, calibration, and amplification.

Intended for use with non-corrosive, non-ionic gases and liquids, these sensors feature a wide operating temperature range of -40°C to 125°C (-40°F to 257°F) and offer numerous package styles, pressure ranges, housings, and porting options. Potential applications include hospital beds, wound therapy machines, oxygen concentrators, industrial controls and HVAC transmitters. With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 8.9 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

About Honeywell Sensing and Control

Honeywell Sensing and Control manufactures more than 50,000 products ranging from snap action, limit, toggle, and pushbutton switches to sensors for position, speed, pressure, torque, temperature, humidity, and airflow. Honeywell Sensing and Control has a product to meet your needs.

Honeywell Sensing and Control brings engineering expertise and capabilities that no other company offers. With its comprehensive portfolio, quality, and reliability, Honeywell Sensing and Control products support every step of your most demanding goals and standards to deliver consistent, trustworthy performance.

Trademarks

Mouser and Mouser Electronics are registered trademarks of Mouser Electronics, Inc. All other products, logos, and company names mentioned herein may be trademarks of their respective owners.
