

New Product Announcement

Mouser Stocks New Teledyne LeCroy HDO High Definition Oscilloscope *12-Bit ADC Provides 16 Times More Resolution*

December 3, 2012 – [Mouser Electronics](http://www.mouser.com), Inc. is offering the new HDO Series of High Definition Oscilloscopes from [Teledyne LeCroy](http://www.teledynelecroy.com). The new series with 12-bit ADCs provides 16 times more resolution than 8-bit instruments.

HDO Oscilloscopes use HD4096 high definition technology marked by high sample rate 12-bit ADCs, amplifiers with high signal-to-noise ratios, and low-noise system architecture. Features include an intuitive touch-screen interface, local language user interface, WaveScan advanced search and find, history mode for waveform playback, and sequence mode ideal for capturing fast pulses in quick succession. Other features include LabNotebook tool for documentation and report generation, and options for serial data decode, power analysis mode, and spectrum analyzer mode.

HDO 4000 Oscilloscopes deliver a sample rate of 2.5 GS/s with up to 25 Mpts/channel of memory (up to 50 Mpts/ch interleaved). Two- and four-channel models are available from 200 Mhz to 1 Ghz. All models provide powerful debug tools and a full range of automatic measurements and waveform math functions. To learn more, visit <http://www.mouser.com/new/lecroy/LeCroy-HDO4000/>.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects.

Mouser Electronics' website is updated daily and searches more than 10 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

About Teledyne LeCroy

Teledyne LeCroy is a leading provider of oscilloscopes, protocol analyzers and related test and measurement solutions that allow companies to design and test all types of electronic devices in a wide range of industries, including semiconductor, computer, consumer electronics, military/aerospace, automotive/industrial, and telecommunications. Teledyne LeCroy's oscilloscopes combine large and informative displays with advanced waveshape analysis capabilities tailored to enhance the capabilities of engineers in serial data test, disk drive test, automotive bus analysis, and more. Teledyne LeCroy is committed to developing products that help engineers increase productivity and design faster and more effectively, in addition to meeting the demands of a growing market that utilizes serial data communications across a broad range of applications.
