

For Immediate Release

Mouser Stocks New WaveAce 1000/2000 Oscilloscopes from LeCroy

July 9, 2012 – [Mouser Electronics](http://www.mouser.com), Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced it is stocking the new [LeCroy](http://www.lecroy.com) WaveAce 1000 and 2000 Oscilloscopes.

These expansion models offer sample rates up to 2 GS/s, with memory up to 1 Mpts/ch (2 Mpts interleaved) and bandwidths ranging from 40 MHz to 300 MHz. The new oscilloscopes feature a large 7" widescreen display, 32 standard automatic measurements, five math functions, pass/fail mask testing, large internal storage, remote control, and waveform recorder. Up to five measurements can be displayed without crowding the waveform grid, or all 32 measurements can be shown at once with the dashboard. Waveform math capabilities include basic Add, Subtract, Multiply, and Divide functions, plus FFT which can be viewed using four different windows and two different vertical scales. The large internal storage allows saving and recall of up to 20 waveforms and 20 setups. Connectivity is provided via a USB host port on the front panel for saving screen images, waveforms, and setups to a memory stick. In addition, a rear panel USB device port provides connection to a PC or printer. The Waveform Sequence Recorder can capture and replay up to 2,500 waveforms. With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 8.9 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

About LeCroy

LeCroy is a leading provider of oscilloscopes, protocol analyzers and related test and measurement solutions that allow companies to design and test all types of electronic devices in a wide range of industries, including semiconductor, computer, consumer electronics, military/aerospace, automotive/industrial, and telecommunications. LeCroy's oscilloscopes combine large and informative displays with advanced waveshape analysis capabilities tailored to enhance the capabilities of engineers in serial data test, disk drive test, automotive bus analysis, and more. LeCroy is committed to developing products that help engineers increase productivity and design faster and more effectively, in addition to meeting the demands of a growing market that utilizes serial data communications across a broad range of applications.

Trademarks

Mouser and Mouser Electronics are registered trademarks of Mouser Electronics, Inc. All other products, logos, and company names mentioned herein may be trademarks of their respective owners.
