

## For Immediate Release

### **TE Connectivity Nector S Line UL Lighting Connectors Now at Mouser**

*Meets the lighting industry's need for a compact, easy-to-install interconnect solution.*

**July 19, 2012** – [Mouser Electronics](http://www.mouser.com), Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced it is stocking Nector S Line UL style lighting connectors from [TE Connectivity \(TE\)](http://www.teconnectivity.com).

TE introduces the Nector S Line UL style lighting connectors to provide a power connection for small luminaires built into furniture, commercial refrigeration, retail display and kitchen cabinetry as well as other applications that require small-size connections. Featuring a compact 7.5mm circular design that easily fits through openings as small as 8mm in diameter, TE's Nector S Line UL style lighting connectors provide designers the ability to create innovative lighting fixtures because the size of the connector helps eliminate interference with the fixture's design.

Compliant with UL 1977 electrical specifications, these expandable connectors support plug-and-play functionality for ease of use. A 6 way power distributor connector utilizes IDC crimp tap contacts for quick termination and crimp-style pin and socket terminals for cable assembly lead connections. Other components include pc board headers, splitters, panel mount housings and bridge connectors that complete the product offering. Keyed for 125 AC high-voltage, 6 Amp and 42 DC low-voltage, 7 Amp applications, Nector S line connectors may be used in applications that require a power connection and coupling between lamps. With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 8.9 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

### **About Mouser Electronics**

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

### **About TE Connectivity**

TE Connectivity is a global, \$14 billion company that designs and manufactures approximately 500,000 products that connect and protect the flow of power and data inside the products that touch every aspect of our lives. Our nearly 100,000 employees partner with customers in virtually every industry—from consumer electronics, energy and healthcare, to automotive, aerospace and communication networks—enabling smarter, faster, better technologies to connect products to possibilities. More information on TE Connectivity can be found at [www.te.com](http://www.te.com).
