

For Immediate Release

Mouser First to Stock Vishay TSOP Series IR Receiver Modules for 3D Synchronization Signals

May 16, 2012 – [Mouser Electronics](http://www.mouser.com), Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced that it is shipping the TSOP35D26 & TSOP75D26 IR Receiver Modules for 3D synchronization signals from [Vishay Semiconductors](http://www.vishay.com).

Vishay Semiconductors' TSOP35D26 & TSOP75D26 IR Receiver Modules are SMD IR receiver sensors for 3D synchronization signals. The receivers are designed to operate at a carrier frequency of 26.2kHz and a wavelength of 830nm to avoid interference with standard remote control systems at 940nm and 30kHz to 56kHz. These TSOP Series IR Receiver Modules can receive continuously transmitted signal patterns with a minimum burst length of 6 cycles and frame rates up to 200Hz. The circuits provide excellent suppression of optical noise from CFLs, LCD backlight, and plasma panels, and multiple models are selectable based on circuit configuration and required transmission distance. For more information, visit <http://www.mouser.com/vishaysemilR3D/>.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 8.9 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

About Vishay Semiconductors

Vishay Semiconductors is the world's #1 supplier of infrared data communications devices (IRDCs), and rectifiers. Vishay is the #2 supplier of optocouplers and the #3 supplier of optical sensors. In these areas, Vishay Semiconductors combines the product lines of the former Vishay Telefunken, General Semiconductor (the largest producer of low-to-medium power rectifiers and TVS diodes), as well as the infrared components business of Infineon Technologies. Together, they provide Vishay Semiconductors' customers with a single source for a broad portfolio of general semiconductor products used for short-range infrared data transmission, power management, remote controls, and electrical safety. For more information, visit <http://www.mouser.com/vishaysemiconductors>.

Trademarks
